Surviving Cyberwar Richard Stiennon, 2010-05-16 Military and intelligence leaders agree that the next major war is not likely to be fought on the battleground but in cyber space Richard Stiennon argues the era of cyber warfare has already begun Recent cyber attacks on United States government departments and the Pentagon corroborate this claim China has compromised email servers at the German Chancellery Whitehall and the Pentagon In August 2008 Russia launched a cyber attack against Georgia that was commensurate with their invasion of South Ossetia This was the first time that modern cyber attacks were used in conjunction with a physical attack Every day thousands of attempts are made to hack into America s critical infrastructure These attacks if successful could have devastating consequences In *Surviving Cyberwar* Stiennon introduces cyberwar outlines an effective defense against cyber threats and explains how to prepare for future attacks The book begins with Shawn Carpenter and his discovery that China had hacked into his work place Sandia Labs follows the rise of cyber espionage on the part of the Chinese People s Liberation Army PLA as increasingly sophisticated and overt attacks are carried out against government and military networks around the world moves from cyber espionage to cyberwar itself revealing the rise of distributed denial of service DDoS as a means of attacking servers websites and countries provides a historical perspective on technology and warfare is provided drawing on lessons learned from Sun Tsu to Lawrence of Arabia to Winston Churchill and finishes by considering how major democracies are preparing for cyberwar and predicts ways that a new era of cyber conflict is going to impact the Internet privacy and the way the world works This text is a stimulating and informative look at one of the gravest threats to Homeland Security today offering new insights to technologists on the front lines helping policy makers understand the challenges they face and providing guidance for every organization to help reduce exposure to cyber threats It is essential reading for anyone concerned with the current geopolitical state of affairs
