Musical Notation in the West James Grier, 2021-02-18 Musical notation is a powerful system of communication between musicians using sophisticated symbolic primarily non verbal means to express musical events in visual symbols Many musicians take the system for granted having internalized it and their strategies for reading it and translating it into sound over long years of study and practice This book traces the development of that system by combining chronological and thematic approaches to show the historical and musical context in which these developments took place Simultaneously the book considers the way in which this symbolic language communicates to those literate in it discussing how its features facilitate or hinder fluent comprehension in the real time environment of performance Moreover the topic of musical as opposed to notational innovation forms another thread of the treatment as the author investigates instances where musical developments stimulated notational attributes or notational innovations made practicable advances in musical style
