intelligence But how does this system work How does it determine whether a Korean drama will be a hit in Latin America or a true crime documentary will go viral around the world In this chapter we dive into the heart of Netflix the algorithm that drives recommendations retains subscribers and creates cultural phenomena The Data Driven Entertainment Revolution In the past the choice of what to watch was limited to broadcast TV programming or titles available at rental stores The arrival of streaming has changed this dynamic putting thousands of options within the reach of consumers However a large selection can be a problem Faced with a vast catalog users often feel lost and spend more time searching for a film than watching it Netflix solved this problem with a sophisticated algorithm developed over years to understand and predict the individual tastes of each subscriber Unlike traditional television where the programming schedule is fixed and the same for everyone Netflix delivers a unique personalized and dynamic experience This system not only suggests titles but shapes audience behavior and anticipates trends before they even emerge Continued
