predictable milestones in a race or training session You get more stamina You get fewer injuries Last but not least you can get faster chip times All of this contributes to greater happiness as an endurance athlete and I m all about happier running and walking Unfortunately there has been a gap that has driven many of us run walk athletes crazy Let me talk more about that in a moment Do you prefer guessing folklore driving directions or a map Seriously how do you figure out just the right combination of running and walking on any given day and for any given race or training distance Let s compare it to driving from point A to point B You could guess Some of us have done this at least when we were younger Well let s see If I want to go to the convention center then I guess that I ll start by driving toward downtown and keep looking for the big building along the way You could rely on folklore Many of us have done this A neighbor told me that I should take highway X to somewhere around street Y and then go left until I get to street Z and the convention center will be around there somewhere You could use driving directions A lot of us do this now We get driving directions from a GPS unit which can work well until the unit dies suddenly or there is an unexpected obstacle Or we go online enter our starting point and destination and print the directions Still printed directions cannot handle unexpected detours and they give you no sense of the greater territory around say the convention center destination You could use a map I know What s that Yes you have to learn how to read maps You have to locate on a map where you are now and where say the convention center is But a map eliminates guessing and folklore never dies suddenly and gives you options LOTS of options when one route or another is blocked Pace calculators are like driving directions websites Yes you could search the Web and find some run walk pace calculators that will let you enter some variables to get some other variables A pace calculator is like a driving directions website You enter some stuff and it tells you what to do That s fine as far as it goes But what if you were to run into an obstacle Would you know what to do The fact is you could poke and prod all day with a pace calculator and still not end up with the big picture about how YOU can best use the run walk method In contrast pace tables are like maps Now think about a map It gives you the big picture and this gives you LOTS of options to achieve your goal Pace tables are like maps They give you the big picture and lots of options to achieve your goal This book fills the gap of pace tables for the run walk method [Walk Your Way to Weight Loss](#) Lindsey P,2014-08-11 [Walk Your Way To Weight Loss 2nd edition The Ultimate Guide On How To Lose Weight Burn Fat Stay Thin With Walking](#) Walking is amazingly one of the easiest cheapest and safest ways for you and everyone else to get up and start exercising Health experts all agree that a 30 minute moderate physical activity on most days in a week is a must and walking is one of the best examples around There have been so many reported health benefits of walking like reducing the risks for certain medical conditions heart disease and high blood pressure reducing depression making us much happier and livelier instead helping us all to sleep better at night which is simply what everyone wants these days and of course WEIGHT LOSS Better yet think of walking as an all in one package program with all the amazing health benefits Nothing could be better than this The same health experts also agree on the fact that engaging in physical activities
