Systemic Functional Linguistics Through the Cardiff Grammar Robin Fawcett, 2008-07 This short book is two books in one. First it is a genuinely introductory introduction to the main concepts of Systemic Functional Grammar (SFG) for the 21st century. Drawing on recent research, it focuses on the structure of the clause in English, bringing out clearly i) the multifunctional nature of language and ii) the way in which structures are the result of choices between meanings. It is an extension of Halliday's SFG in several ways, including the introduction of new elements that are of growing importance in the language and a simplification of it in that it shows how the many strands of meaning in a clause can be expressed in a single structure. But this is also a book for experienced linguists who may include the teachers of the first group who are interested in a scholarly work which i) compares the two main current versions of Systemic Functional Grammar with respect to the structure of the English clause and ii) gives reasons for every decision to prefer one analysis to another. This book, within a book, is achieved through a generous use of extended footnotes. The Cardiff Grammar version of SFG is based as firmly on the core principles of SFG as the Sydney Grammar, the version in Halliday's *Introduction to Functional Grammar*. Halliday, however, describes the development in the Sydney Grammar since the 1970s as expansions into new areas beyond what he has aptly termed the lexicogrammar. In contrast, the Cardiff Grammar's description of English lexicogrammar and other languages has made significant advances since the 1970s under the influence of eight major factors. Versions of this book are being published concurrently in Chinese by Peking University Press and Spanish University of Plata del Mar Press.

A Systemic Functional Grammar of French David Banks, 2017-02-10 A Systemic Functional Grammar of French provides an accessible introduction to systemic functional linguistics through French. This concise introduction to the systemic functional grammar (SFG) framework provides illustrations throughout that highlight how the framework can be used to analyse authentic language texts. This will be of interest to students in alternative linguistic frameworks who wish to acquire a basic understanding of SFG as well as academics in related areas such as literary and cultural studies interested in seeing how SFG can be applied to their fields.

Halliday's Introduction to Functional Grammar M.A.K. Halliday, Christian M.I.M. Matthiessen, 2013-09-11 Fully updated and revised, this fourth edition of Halliday's *Introduction to Functional Grammar* explains the principles of systemic functional grammar, enabling the reader to understand and apply them in any context. Halliday's innovative approach of engaging with grammar through discourse has become a worldwide phenomenon in linguistics. Updates to the new edition include recent uses of systemic functional linguistics to provide further guidance for students, scholars, and researchers. More on the ecology of grammar illustrating how each major system serves to realise a semantic system. A systematic indexing and classification of examples from corpora, thus allowing for easy access to data. Halliday's *Introduction to Functional Grammar*, Fourth Edition, is the standard reference text for systemic functional linguistics and an ideal introduction for students and scholars interested in the relation between grammar, meaning, and discourse.

Coherence and the Textual Function in "The Curious Incident of the Dog in the Night-time" Marieke Jochimsen, 2010-04 Seminar paper from the year 2008 in the subject English Language and Literature Studies Linguistics grade 2.0 University of Münster
Englisches Seminar course Systemic Functional Linguistics language English abstract
Wherever we look we see language constituting the world not just reflecting it For instance the words for colours make a reality they don t just name things which are there the spectrum isn t divided into seven primary colours all the colours merge into one another According to structural linguistics by using language we are not reflecting a given reality but are rather construing one Systemic functional grammar developed by M A K Halliday states just this construal feature of language as well That language functions to make meanings and not to only refer to the outside world But furthermore elaborates on how a text makes those meanings It focuses therefore on the functional description of language The basic assumption is that language use is always functional people do not just talk or just write 2 but rather any use of language serves a specific purpose namely to make meanings The primary concern of systemic functional linguistics can therefore be summed up under the questions How is language structured for use 3 How does it make meanings According to Halliday language makes meanings on three different levels simultaneously on the experiential level because it represents experience on the interpersonal level because language is used to interact with each other and on the textual level because we organize our message somehow This research paper will focus on the textual metafunction of language which is the theory of the clause being organized as a message The aim is to show that text itself construes the context by involving meaningful choices concerning what to put in thematic position and by means of cohesion Thus context is not only created through coherence i e the outside knowl
