J S Katre For Communication Engineering:

Wireless Communication-the fundamental and advanced concepts Sanjay Kumar,2022-09-01 Wireless communication is one of the fastest growing fields in the engineering world today Rapid growth in the domain of wireless communication systems services and application has drastically changed the way we live work and communicate Wireless communication offers a broad and dynamic technological field which has stimulated incredible excitements and technological advancements over last few decades The expectations from wireless communication technology are increasing every day This is placing enormous challenges to wireless system designers Moreover this has created an ever increasing demand for conceptually strong and well versed communication engineers who understand the wireless technology and its future possibilities In recent years significant progress in wireless communication system design has taken place which will continue in future Especially for last two decades the research contributions in wireless communication system design have resulted in several new concepts and inventions at remarkable speed A text book is indeed required to offer familiarity with such developments and underlying concepts to be taught in the classroom to future engineers This is one of the motivations for writing this book Practically no book can be up to date in this field due to the fast ongoing research and developments The new developments are announced almost every day Teaching directly from the research papers in the classroom cannot build the necessary foundation Therefore need for a textbook is unavoidable which is integral to learning and is an essential source to build the concept The prime goal of this book is to cooperate in the learning process Innovative Data Communication Technologies and Application Jennifer S. Raj,Khaled Kamel,Pavel Lafata,2022-02-24 This book presents the latest research in the fields of computational intelligence ubiquitous computing models communication intelligence communication security machine learning informatics mobile computing cloud computing and big data analytics The best selected papers presented at the International Conference on Innovative Data Communication Technologies and Application ICIDCA 2021 are included in the book The book focuses on the theory design analysis implementation and application of distributed systems and networks

Recent Trends in VLSI and Semiconductor Packaging T. Vasudeva Reddy,K. Madhava Rao,2025-05-06 The International conference on Semiconductor Materials packaging AI ML Reconfigurable VLSI architectures for IoT future Communication Technologies SMART 2024 aimed to provide a platform for researchers academicians industry experts and practitioners to exchange ideas present research findings and discuss emerging trends and challenges in the specified fields SMART 2024 seeked to foster collaboration innovation and knowledge dissemination by bringing together experts and stakeholders from diverse backgrounds to address key issues and explore new research directions The conference targeted a diverse audience including researchers academicians scientists engineers technologists industry professionals students policymakers and other stakeholders interested in VLSI IoT AI ML communication systems semiconductor packaging hetero architecture devices and Nano materials *Architectures and Frameworks for Developing and Applying Blockchain*

Technology Shi, Nansi, 2019-06-28 The blockchain revolution has drastically impacted global economics and the strategic practices within different industries Cryptocurrency specifically has forever changed the face of business and the implementation of business online While innovative people are still in the early stages of building and developing blockchain technology and its applications and it is critical that researchers and practitioners obtain a better understanding of this global phenomenon Architectures and Frameworks for Developing and Applying Blockchain Technology is an essential reference source that presents the technological foundation recent research findings developments and critical issues associated with blockchain technology from both computer science and social science perspectives Featuring topics such as artificial intelligence digital economy and network technology this book is ideally designed for academics researchers industry leaders IT consultants engineers programmers practitioners government officials policymakers and students
