Unusually Cruel Marc Morjé Howard, 2017-06-16 The United States incarcerates far more people than any other country in the world at rates nearly ten times higher than other liberal democracies Indeed while the U S is home to 5 percent of the world s population it contains nearly 25 percent of its prisoners But the extent of American cruelty goes beyond simply locking people up At every stage of the criminal justice process plea bargaining sentencing prison conditions rehabilitation parole and societal reentry the US is harsher and more punitive than other comparable countries In Unusually Cruel Marc Morj Howard argues that the American criminal justice and prison systems are exceptional in a truly shameful way Although other scholars have focused on the internal dynamics that have produced this massive carceral system Howard provides the first sustained comparative analysis that shows just how far the U S lies outside the norm of established democracies And by highlighting how other countries successfully apply less punitive and more productive policies he provides plausible solutions to addressing America s criminal justice quagmire

Williams, 2020-09-30 Join a cast of characters with different perspectives thinking through some of the biggest questions in life as they discuss atheist Richard Dawkins s book Outgrowing God A Beginner s Guide Written in the form of a dialogue between members of a student book club Outgrowing God A Beginner s Guide to Richard Dawkins and the God Debate encourages critical thinking about

Professor Dawkins's arguments concerning God, Jesus, and the Bible **Uncertain Allies** Klaus Larres, 2021-11-30 The United States has long been conflicted between promoting a united Western Europe in order to strengthen its defense of the West and fearing that a more united Western Europe might not submit to American political and economic leadership. The era of wholehearted support for European unity was limited to the immediate postwar era. The stances of the past three U.S. presidents—Bush's unilateralism, Obama's insistence on leading from behind, and Trump's overt hostility toward the European Union—were prefigured by Washington's economic and geopolitical strategies of the 1960s and 1970s. Concentrating on the policies of Richard Nixon and Henry Kissinger, Klaus Larres argues that their years in office were the major turning point when benign hegemony gave way to an attitude toward Europe that was seldom better than lukewarm, frequently even outright hostile, and that was returned in kind. This book offers an unusually clear and comprehensive examination of transatlantic relations during the Nixon era. Bioengineering Abstracts, 1984 *Disruption and Digital Journalism* John V. Pavlik, 2021-10-06 This book offers a timely insight into how the news media have adapted to the digital transformation of public communication infrastructure. Providing a conceptual roadmap to understanding the disruptive innovative impact of digital networked journalism in the 21st century, the author critically examines how and to what extent news media around the world have engaged in digital adaptation. Making use of data from news media content production and distribution both off and online, as well as user and financial data from the U.S. and internationally, the book traces how the news media embraced and reacted to key developments such as the invention of the World Wide Web in 1989 and the launch of Google in 1998, Facebook in 2004, and the Apple iPhone in 2009. The author also highlights innovative organizations that have sought to reimagine news media that are optimized for digital, online, and mobile media of the 21st century, demonstrating how these groups have been able to stay better engaged with the public. *Disruption and Digital Journalism* is recommended reading for all academics and scholars with an interest in media, digital journalism, studies, and technological innovation. **The Engineering Index Bioengineering Abstracts**, 1984 Monthly Covers the world's technological literature in biomedical engineering and technology.
