It involves understanding, communication, and negotiation to find solutions that are acceptable to all parties involved. The goal is to reach an outcome that minimizes hostility and promotes harmony and understanding.

By reflecting back what they've heard, they validate the speaker's feelings. This creates a foundation of trust and between conflicting parties.

Conflict and Dispute Resolution Mieke Brandon, Leigh Robertson, 2007 Conflict and Dispute Resolution is a practical guide to understanding dispute resolution theory in the context of organisational, psychological, and social work themes. It covers the spectrum of interventions from the prevention of conflict, ignoring it, managing it through feedback, difficult conversations, self-mediation, conflict coaching, to facilitative processes such as dispute facilitation, mediation, conciliation, and managing groups and multi-party disputes. The book encourages diverse thinking about how conflict impacts not only on the individual but also on relationships in their broadest sense at home, at work, locally, and globally. The authors show how to apply the theoretical aspects of mediation to skill building for conflict management, negotiation, and mediation, and include discussion of assessment methods. Conflict Resolution and Mediation is comprehensive in its coverage of all the skills and processes needed by students, coaches, mentors, and practitioners to help deal with dilemmas and become reflective practitioners. It is complete with case studies, clear examples, and dialogue extracts to assist in becoming more aware and more effective at being able to provide an appropriate process for parties to achieve their outcome.

The Psychology of Peacekeeping Harvey Langholtz, 1998-08-27 Langholtz examines how psychology and other social sciences can offer both theoretical explanations and practical applications in the resolution and amelioration of potentially violent international conflicts. Since the end of the Cold War and bipolar ideologies, the international community has been willing to intervene using approaches that are founded as much in psychology as in force, and these remedies have not been confined to the violent periods of conflicts. This book examines psychological interventions and issues during three phases of conflicts. First, the book examines measures available in advance of a threatening conflict through early intervention and an examination of ethno-political issues, economic problems, and potential diplomatic solutions. Second, psychological facets of peacekeeping are examined: the selection of peacekeepers, psychological ambiguities of peacekeeping, and the numbing that comes with widespread suffering. Finally, the book examines the psychological measures available to strengthen a cease-fire, deal with mines, and related after-effects of war, encourage reconciliation, and hasten the return to a stable and durable peace.
