Weronika Łaskiewicz, Grzegorz Moroz, Jacek Partyka, 2016-02-08 This volume stems from the assumption that broadly understood borderlands as well as peripheries provinces or uttermost ends of different kinds are abodes of significant culture generating forces From the academic point of view their undeniable appeal lies in the fact that they constitute spaces of mutual interactions and enable new cultural phenomena to surface grow or decline and as such are worth thorough and constant scrutiny However they also provide the setting for radical clashes between ideologies languages religions customs and as the media report every single day armies or guerrilla units Living within such areas of creative dynamics and destructive friction or visiting them even vicariously as the contributors to the volume do is tantamount to exposing oneself to a difference One's response to this difference either in the form of rejection or more preferably acceptance or a mixture of both is not merely an index of one's tolerance a platitudinised term itself that all too often hides an attitude of comfortable indifference but an affirmation of humaneness Borderlands are paradoxical if not aporetic loci They simultaneously connote territories on either side of a border in a literal sense and a vague intermediate state or region in a metaphorical sense Encapsulating the idea of border the term indicates both inescapable nearness and unavoidable or perhaps unbridgeable separateness The studies included in the volume focus on various aspects of borderland art and literature on analyses of selected works and on the peculiarities of cultural and literary representations Thus the borderland landscape both literal and metaphorical comes to be seen as a factor contributing to the emergence of new distinct and identifiable themes and motifs as well as theoretical frameworks Changing the Nation Rebecca Braun, Frank Brunssen, 2008 **Urban Heritage in Europe** Gábor Sonkoly, 2023-04-17 Urban heritage which is part of the conceptual expansion of cultural heritage has become an extraordinarily complex notion Any aspect of urban life and experience can become heritage and this heritage is then continuously reinterpreted and exploited as a source not only for a city's identification but also for its cultural and economic innovation This book provides a detailed overview of Central European urban heritage It examines the key aspects of urban heritage tangible monumental natural landscape world heritage urban quarter and heritage experience dark heritage The regimes of urban heritage approach retraces 200 years of the development of European urban heritage to understand how it has become so significant and how it could integrate practically every area of urban existence The novelty of the book is the interpretation of this development as a process of successive and integrating regimes which are examined through the changing urban heritage agency and discourse Through the examples of European cities and towns such as Belgrade Budapest Gdansk Krakow Ljubljana Subotica Szentendre Vienna but also Edinburgh Nordic cities and Rome these changes reveal their inner complexities and become comparable in an interdisciplinary analysis Further a particular aspect of the history of these cities is revealed through the development of their own urban heritage The book is primarily aimed at
