Summary of Brooke Harrington's Capital without Borders Everest Media, 2022-05-13T22:59:00Z Please note This is a companion version rather they coexist in uneasy tension with one another 2 The work of wealth managers is governed by an aristocratic code based on service loyalty and honor They defend large concentrations of wealth from attack by outsiders 3 The practice of trusteeship which is the transfer of title to an adult male friend or relative while the original landowner is still alive was developed to solve the problems of land seizures and taxes It was a method of applying two forms of ownership to a single property 4 The system of trusts which was in place in England America and other common law countries allowed elites to preserve their wealth by transferring it into trust This was done by evading the laws that threatened to dissipate dynastic wealth

Big Crime and Big Policing Tonita Murray, Elizabeth Kirley, Stephen Schneider, 2024-07-05 Following money over national borders banking systems casinos and free trade zones as well as the world of the corrupt elites Big Crime and Big Policing brings new scholarly and practical insights into our understanding of the interplay of money crime and policing on the grand scale In this wide ranging volume a mixed group of scholars and practitioners aim to show how money dictates the scope and nature of financial and corporate crimes and the impact of these crimes on national economies social institutions and communal well being alike The book examines how the combined efforts of governments and international organizations fail to stop financial crime at its source and despite apparently generous human and financial resources police and law enforcement efforts ultimately fall short of defeating big crime and of meeting public safety needs International in scope Big Crime and Big Policing provides fresh reflection on a significant problem of our age one that demands greater attention from governments and the public

Asia-Pacific Trusts Law, Volume 2 Ying Khai Liew, Ying-Chieh

Wu, 2022-12-15 This book brings together leading legal scholars and practitioners from across the Asia Pacific region to probe the ways in which trusts law has been adapted by various jurisdictions and to analyse their causes and effects The contributions discuss how the trust structure with its inherent malleability has been adapted to meet a diverse set of local needs including social religious economic commercial or even historical needs But in most instances those needs and the ways in which trusts law has been adapted to meet them are not unique to a single jurisdiction they often coincidentally or otherwise find much in common with others By making its readers aware of the commonality of needs in Asia Pacific this book also aims to encourage coordination and cooperation in utilising trusts law to address shared concerns across the region

Strong Democracy in Crisis Trevor Norris, 2016-05-12

This is a robust and relevant collection from a truly distinguished group of political theorists actively rethinking the promise and perils of democracy The book is coherent in its focus on a common theme and aim to advance and refine the political project of promoting democratic theory and practice While the contributors are admirers of the promotion of various models of democracy they also express distinct approaches and concerns Each builds on and expands the central theme of democracy and ultimately contends with potential limits of current configurations of democratic life While to some extent they share common concerns they express considerable dissent and fruitful opposition that deepens and advances the debate Contributors explore democracy from different perspectives law and constitutionalism globalization and development public life and the arts pluralism democracy and education and democratic listening and democratic participation The contributions point towards new ways of living and thinking politically new directions for contending with some of the more significant and seemingly intractable political problems challenging conventional presuppositions about democracy by expanding the boundaries of what kinds of democracy may be possible The book critiques liberal notions of democracy that forefront rational autonomy and a citizenship characterized by narrow self interest and critique naive claims that any infringement on the rights of the autonomous individual must invariably lead to authoritarianism and totalitarianism Instead contributors suggest that the abandonment of the res publica in pursuit of private interests may well lead to arid politics or authoritarianism Citizens are called upon to be more than just voters but rather define themselves by participation in a community beyond their self interest in fact arguing like Aristotle Rousseau Jefferson and Arendt that we are only human when we participate in

something beyond ourselves that we forge and preserve our political community by our commitment to and participation in robust debate and meaningful political action Contributors are not only revolutionary scholars that challenge problematic streams of democratic theory and traditions but are deeply involved in shaping the character and constitution of the American body politic and promoting debates about community and citizenship and justice around the world
