R. Dan Walleri, Marsha K. Moss, 1995-12-27 The proliferation of college

guidebooks and reputational rankings has become of increasing concern to many in the higher education community. Public relations and admissions staff view such publications from a marketing perspective and the potential positive or negative consequences for enrollment. College presidents share these concerns along with the broader implications for the overall stature of their institutions. The validity and integrity of the information reported is of particular interest to those who work in the area of institutional research. Acknowledging the fact that the public, the consumers, has a great need for information about different institutions in order to make informed college choices for themselves or their children, all of these groups in higher education share alarm about the burden imposed on institutions in responding to the ever increasing number of publishers requesting information for these guidebooks and rankings. This volume explores some of the major facets of and issues surrounding college guidebooks and ratings. The background and development of these publications are traced followed by discussion of major issues and perspectives: consumer use of the publications, validity of ratings and the institutional burden of supplying the needed information. Views from both the institutions and the publishers are presented. This is the 88th issue of the quarterly journal *New Directions for Institutional Research*. For more information on the series please see the Journals and Periodicals page.

Between Mission and Market Daniel Rosenberg, 2017-04-26 *Between Mission and Market: The Freshman Year in a Corporate Age* focuses on the arrival of college freshmen at the moment of the transformation. It uses Adelphi University in suburban New York City to study an attempt to resolve first year difficulties. As higher education institutions turn into enterprises run on business models, the pressures of getting into college, including the taking of the SAT and ACT, have induced stress, addictions, eating disorders, drug use, and mental problems. However, special programs to ease the first year transition through counseling and support are run as cheaply as possible. This book confronts some of the cardinal controversies in higher education, particularly those affecting first year students: high stakes testing in general, particularly the SAT, the intensification of student debt, and the financial sentence imposed upon all who incur it, and the dramatic pressures placed upon freshmen as they transition to college.
