Beyond Prime Time Amanda Lotz, 2010-04-02 *Beyond Prime Time* brings together established television scholars writing new chapters in their areas of expertise that reconsider how programming forms other than prime time series have been affected by the wide-ranging industrial changes instituted over the past twenty years. The chapters explore the relationship between textual and industrial changes in particular forms such as news, talk, sports, soap operas, syndication, children's programming, made-for-television movies, public broadcasting, and local programming.

Sports Analytics Leonard C. Maclean, William T. Ziemba, 2021-12-22 This book is a collection of applications of analytic techniques to a number of popular sports, including baseball, basketball, hockey, Jai Alai, NFL football, and horseracing. We focus on both the statistics of the sporting events and betting strategies on the events. The subject is fascinating as there are many twists and subtle, complicated decisions. Sports analytics applies mathematical and statistical methods to important questions in the structure and performance of sporting activities using the same basic methods and approaches as data analysts in other disciplines. Sports games and events are a fruitful area for study and to evaluate betting strategies as there is extensive data and mean reversion. With prices changing continuously, risk arbitrage bets can be made. Moreover, little errors like a penalty to a player or an error in a call by a referee can change the score of a game and corresponding betting prices. The collection and analysis of in-game data can inform players, coaches, and staff on effective decision making during sporting events. Novel features of the book include an analysis of who were the greatest baseball batters, analyses of the players most important to team success, and they are not necessarily the best players in basketball, NFL football, and hockey; a tutorial on risk arbitrage and its applications to NFL football and NBA basketball; a discussion of many ad hoc decision rules by coaches and players; and what was really optimal in the racing section, we discuss breeding, the analysis of various bets like the Rainbow and ordinary Pick 6, a discussion and betting on the most important races, and a visit to the Breeders Cup with Ed Thorp to demonstrate the place and show system in action.
