

# Quality Control Interview Questions & Answers

Change controls are of two types i.e., major and minor.

## Q11. Corrective action & preventive action?

**Corrective action:** An action taken to eliminate the cause of the existing deviation, incident or problem in order to prevent its recurrence (occurring again).

**Preventive action:** An action taken to eliminate the cause of potential deviation, incident or problem in order to prevent its occurrence (an incident or event).

## Q12. What is chromatography?

Chromatography is an analytical technique commonly used for separating a mixture of chemical substances into its individual components, so that the individual components can be thoroughly analyzed.

Chromatography is a laboratory technique for the separation of a mixture. The mixture is dissolved in a fluid called the mobile phase, which carries it through a structure holding another material called the stationary phase and the separation is based on differential partitioning between the mobile and stationary phases.

## Q13. What is difference between Stationary Phase and Mobile Phase?

The key difference between stationary and mobile phase is that stationary phase does not move with the sample whereas mobile phase moves with the sample. Stationary phase and mobile phase are two important terms in chromatography, which is a technique of separation and identification of the components in a mixture.

## Q14. What is column in chromatography?

A Chromatography column is a device used in chromatography for the separation of chemical compounds. A chromatography column contains the stationary phase, allowing the mobile phase to pass through it. The columns are mostly made of borosilicate glass, acrylic glass or stainless steel.

## Q15. Which gas is used in Gas Chromatography?

In GC Nitrogen, Helium and Hydrogen are considered to be suitable carrier gases but Helium is most widely used due to safety concerns associated with hydrogen and also the fact that nitrogen is much less efficient.

## Q16. What is HPLC in chemistry?

High performance liquid chromatography (HPLC) is a technique in analytical chemistry which is used to separate, identify, and evaluate each component in a mixture.

## Q17. What is system suitability?

Before start of analysis of the Chromatographic system like HPLC & GC system suitability has to perform to know that the system is working properly or to know the performance.

System suitability criteria may include such factors as plate count, tailing, retention, and/ or resolution and the above factors are most important as they indicate system specificity, precision, and column stability.
