Regex Matching Exact String With Javascript Stack Overflow:

Refactoring JavaScript Evan Burchard, 2017-03-13 How often do you hear people say things like this Our JavaScript is a mess but we re thinking about using framework of the month Like it or not JavaScript is not going away No matter what framework or compiles to js language or library you use bugs and performance concerns will always be an issue if the underlying quality of your JavaScript is poor Rewrites including porting to the framework of the month are terribly expensive and unpredictable The bugs won t magically go away and can happily reproduce themselves in a new context To complicate things further features will get dropped at least temporarily The other popular method of fixing your JS is playing JavaScript Jenga where each developer slowly and carefully takes their best guess at how the out of control system can be altered to allow for new features hoping that this doesn t bring the whole stack of blocks down This book provides clear guidance on how best to avoid these pathological approaches to writing JavaScript Recognize you have a problem with your JavaScript quality Forgive the code you have now and the developers who made it Learn repeatable memorable and time saving refactoring techniques Apply these techniques as you work fixing things along the way Internalize these techniques and avoid writing as much problematic code to begin with Bad code doesn t have to stay that way And making it better doesn t have to be intimidating or unreasonably expensive
