**The Palgrave Encyclopedia of Urban and Regional Futures** Robert C. Brears, 2023-01-13 While urban settlements are the drivers of the global economy and centres of learning culture and innovation and nations rely on competitive dynamic regions for their economic social and environmental objectives urban centres and regions face a myriad of challenges that impact the ways in which people live and work create wealth and interact and connect with places Rapid urbanisation is resulting in urban sprawl rising emissions urban poverty and high unemployment rates housing affordability issues lack of urban investment low urban financial and governance capacities

rising inequality and urban crimes environmental degradation increasing vulnerability to natural disasters and so forth At the regional level low employment low wage growth scarce financial resources climate change waste and pollution and rising urban peri urban competition etc are impacting the ability of regions to meet socio economic development goals while protecting biodiversity The response to these challenges has typically been the application of inadequate or piecemeal solutions often as a result of fragmented decision making and competing priorities with numerous economic environmental and social consequences In response there is a growing movement towards viewing cities and regions as complex and sociotechnical in nature with people and communities interacting with one another and with objects such as roads buildings transport links etc within a range of urban and regional settings or contexts This comprehensive MRW will provide readers with expert interdisciplinary knowledge on how urban centres and regions in locations of varying climates lifestyles income levels and stages development are creating synergies and reducing trade offs in the development of resilient resource efficient environmentally friendly liveable socially equitable integrated and technology enabled centres and regions

**Urban Growth Analysis and Remote Sensing** Basudeb Bhatta,2012-06-19 This book documents research conducted on the analysis of urban growth and sprawl by using remote sensing data and GIS techniques The research was conducted between 1980 2010 in the city of Kolkata India The aim of the research was to use metrics that were less demanding in terms of data and computation than normal metrics However it has been found that most of them were inferior in capturing insights of urban sprawl For this book some of these metrics have therefore been modified and new ones are proposed The research focuses on problems associated with the analysis of urban growth by using remote sensing data from a technological perspective

*Urban Geology* Pradeep Bhaskarrao Jadhav,2025-09-26 This book presents the result of an innovative challenge to create a systematic literature overview driven by machine generated content Questions and related keywords were prepared for the machine to query discover collate and structure by Artificial Intelligence AI clustering The AI based approach seemed especially suitable to provide an innovative perspective as the topics are indeed both complex interdisciplinary and multidisciplinary for example climate planetary and evolution sciences Springer Nature has published much on these topics in its journals over the years so the challenge was for the machine to identify the most relevant content and present it in a structured way that the reader would find useful The automatically generated literature summaries in this book are intended as a springboard to further discoverability They are particularly useful to readers with limited time looking to learn more about the subject quickly and especially if they are new to the topics Springer Nature seeks to support anyone who needs a fast and effective start in their content discovery journey from the undergraduate student exploring interdisciplinary content to Master or PhD thesis developing research questions to the practitioner seeking support materials this book can serve as an inspiration to name a few examples It is important to us as a publisher to make the advances in technology easily accessible to our authors and find new ways of AI based author services that allow human machine

James Wells,2009      Integration of GIS and Remote Sensing Victor Mesev,2007-12-17 In an age of unprecedented  
proliferation of data from disparate sources the urgency is to create efficient methodologies that can optimise data  
combinations and at the same time solve increasingly complex application problems Integration of GIS and Remote Sensing  
explores the tremendous potential that lies along the interface between GIS and remote sensing for activating interoperable  
databases and instigating information interchange It concentrates on the rigorous and meticulous aspects of analytical data  
matching and thematic compatibility the true roots of all branches of GIS remote sensing applications However closer  
harmonization is tempered by numerous technical and institutional issues including scale incompatibility measurement  
disparities and the inescapable notion that data from GIS and remote sensing essentially represent diametrically opposing  
conceptual views of reality The first part of the book defines and characterises GIS and remote sensing and presents the  
reader with an awareness of the many scale taxonomical and analytical problems when attempting integration The second  
part of the book moves on to demonstrate the benefits and costs of integration across a number of human and environmental  
applications This book is an invaluable reference for students and professionals dealing not only with GIS and remote sensing  
but also computer science civil engineering environmental science and urban planning within the academic governmental
