Trisolaris instant access to all human information means that Earth's defense plans are totally exposed to the enemy. Only the human mind remains a secret. This is the motivation for the Wallfacer Project, a daring plan that grants four people enormous resources to design secret strategies hidden through deceit and misdirection from Earth and Trisolaris alike. Three of the Wallfacers are influential statesmen and scientists, but the fourth is a total unknown: Luo Ji, an unambitious Chinese astronomer and sociologist, is baffled by his new status. All he knows is that he's the one Wallfacer that Trisolaris wants dead. The Dark Forest continues Cixin Liu's ground-breaking saga of incredible scope and vision: The War of the Worlds for the twenty-first century. Prophets of Computing
Dick van Lente, 2022-12-14. When electronic digital computers first appeared after World War II, they appeared as a revolutionary force. Business, management, the world of work, administrative life, the nation-state, and soon enough, everyday life were expected to change dramatically with these machines' use. Ever since, diverse prophecies of computing have continually emerged through to the present day. As computing spread beyond the US and UK, such prophecies emerged from strikingly different economic, political, and cultural conditions. This volume explores how these expectations differed, assesses unexpected commonalities, and suggests ways to understand the divergences and convergences. This book examines thirteen countries based on source material in ten different languages, the effort of an international team of scholars. In addition to analyses of debates, political changes, and popular speculations, we also show a wide range of pictorial representations of the future with computers.

Entanglements and Ambivalences
Hongwei Bao, Daniel H. Mutibwa, 2025-02-18. This book explores the media and cultural exchanges between Africa and China in the twenty-first century against the backdrop of the rise of Africa and China in global geopolitics. It situates these cultural encounters in historical and contemporary contexts and through the critical lens of the Global South. It identifies a rising Global South consciousness despite lingering historical entanglements and emotional ambivalences that continue to characterise Africa-China relations. Bringing together scholars from various disciplines and from different parts of the world, this book examines a wide range of cultural expressions, such as arts, literature, translated works, traditional and digital media artefacts, and services, and film festivals. It also interrogates emerging cultural interactions, experiences, and practices engendered by the increasingly digitalised information and communication technology infrastructure underpinning Africa-China connections and links. In doing so, the book contributes to a more nuanced understanding of Africa-China relations today and the concept of the Global South.

Death's End
