Navigating the Core: Technical Product Management in AI-Driven Infrastructure Dr. Subodh Sachan, Dr. K Yogesh, Prof. Dr. Punit Goel, Niharika Singh, 2026-03-08

Why This Book Now In today's era of unprecedented technological acceleration product management is no longer the sole domain of customer facing apps or consumer driven innovation The backbone of modern enterprises cloud infrastructure distributed systems and artificial intelligence AI requires product leaders who can think both strategically and technically Yet many frameworks and conversations around product management continue to focus on surface level experiences leaving the crucial work of technical product managers TPMs in infrastructure and AI underexplored This book arises from a growing realization the professionals who lead from the middle are shaping the future These individuals do not always sit at the executive table nor do they exclusively write production code Instead they thrive in the tension filled space where engineering realities meet business ambitions As AI technologies redefine industries and infrastructure underpin every digital experience there is an urgent need for a guide that addresses the unique challenges and opportunities faced by TPMs in these domains

From Experience to Practice The ideas presented here are not theoretical abstractions but grounded in lived experience and practice Over the past decade I have witnessed firsthand how TPMs navigate trade offs between scalability and speed compliance and experimentation innovation and stability Their influence is not always visible yet it is deeply impactful This book distills those lessons into practical strategies frameworks and case studies that readers can immediately apply to their own contexts By blending stories from cloud native transformations AI driven product launches and global scale infrastructure projects the book aims to connect abstract leadership principles with actionable steps Each chapter is designed to move seamlessly from concepts to practice equipping readers with tools to make better decisions inspire teams and deliver outcomes that matter

Structure of the Book The book is organized to mirror the journey of a TPM It begins with the essence of leading from the middle and builds the foundation of technical fluency It then moves into critical skills such as stakeholder management product strategy and roadmap creation followed by deeper dives into execution measurement and resilience Later chapters explore the future trajectory of infrastructure and AI product management and culminate in the call to become transformational leaders

Who Should Read This Book This book is written for anyone who operates at the crossroads of technology and leadership Aspiring TPMs will find it a roadmap into the profession Experienced product leaders will discover frameworks to refine their practice and expand their influence Engineers considering a transition into product management will gain insight into how to leverage their technical strengths in leadership roles Finally executives and organizational leaders will benefit from understanding the vital yet often overlooked role that TPMs play in bridging vision and execution

Designing Intelligent Data Fabric Architectures for AI-Powered Multi-Cloud Environments Niharika Singh, Dr. Subodh Sachan, Dr. K Yogesh, Prof. Dr. Punit Goel, 2026-03-08

The rapid evolution of artificial intelligence AI and cloud computing has created an exciting yet challenging landscape for

organizations Today businesses are inundated with vast amounts of data requiring advanced technologies to process analyze and extract valuable insights at a scale and speed that was once unimaginable At the same time the growing adoption of multi cloud strategies offers unparalleled flexibility enabling organizations to leverage the best services from leading cloud providers like AWS Azure Google Cloud and private data centers While this provides tremendous opportunities it also introduces significant complexities in managing and integrating data across disparate environments This book Designing Intelligent Data Fabric Architectures for AI Powered Multi Cloud Environments is written to help organizations navigate these complexities and design data architectures that deliver robust scalable and intelligent systems We address how to architect multi cloud ecosystems that are not only performant but also secure compliant and capable of supporting AI driven intelligence This work aims to demystify the challenges of multi cloud integration and provide actionable insights for building data fabrics that span across diverse platforms Here s what you can expect from this book Foundational Principles Chapters 1 4 We start by examining the key building blocks of data ecosystems including unified ingestion patterns scalable lake house storage and governance frameworks that form the backbone of intelligent architectures Operational Excellence Chapters 5 7 Learn how to implement robust governance security compliance and orchestration techniques that ensure smooth and scalable operations in multi cloud environments Advanced AI Workflows Chapters 8 10 Delve into the intricacies of multi cloud AI model training hyperparameter tuning distributed checkpointing and observability designed specifically for AI driven workflows Integration Patterns Chapter 9 Explore integration strategies for building feature stores and knowledge graphs that enable consistent explainable AI models across multiple environments MLOps DevOps Practices Chapters 11 12 Understand the principles of continuous integration continuous delivery CI CD containerization policy as code and collaborative models essential for seamless deployment in multi cloud environments Thank you for choosing to explore this important topic We hope the insights shared in these chapters will serve as a guide as you design and implement intelligent scalable and secure AI powered data fabric architectures that empower your organization to unlock the full potential of AI

Engineering for Next-Generation SoCs Dr. Subodh Sachan,Prof. Dr. Punit Goel,Niharika Singh,Dr. K Yogesh,2026-03-08 The field of System on Chip SoC design has entered an era of unprecedented complexity where traditional approaches to

physical design no longer suffice As the semiconductor industry pushes forward into advanced process nodes chip designers are confronted with a host of challenges ever shrinking feature sizes increasing power constraints and ever demanding performance metrics In this new era it is clear that the process of bringing a concept from an idea to a production ready chip requires more than just following prescribed steps it demands a profound understanding of flow engineering and the ability to adapt to real world constraints Beyond Physical Design Practical Flow Engineering for Next Generation SoCs is written to fill this gap This book provides an in depth exploration of the advanced methodologies tools and strategies that drive the successful design and implementation of state of the art SoCs Rather than focusing solely on traditional design flows this work introduces readers to the concept of flow engineering where design flows are seen not as rigid sequences but as adaptive evolving processes that must be continuously tuned and optimized in real time to meet the demands of modern chip design Throughout the book we emphasize the need for a holistic approach to SoC design one that integrates physical design with the broader context of system level goals such as power area performance and manufacturability By learning how to engineer and orchestrate these design flows readers can not only leverage existing tools but also innovate in the ways those tools interact and evolve to solve complex design problems Drawing on decades of collective experience across the semiconductor industry academia and research labs this book covers real world design scenarios including challenges faced on actual design floors Through case studies practical examples and discussions of both successes and setbacks we aim to equip engineers researchers and students with the knowledge and skills to handle the ever growing complexity of SoC design at advanced nodes The journey begins by exploring the fundamentals placement routing and timing before diving into more advanced topics like flow orchestration at scale design closure under process variability machine learning driven optimization and future trends like 2.5D 3D integration Each chapter bridges the gap between traditional knowledge and innovative developments offering readers a thorough understanding of both foundational principles and innovative techniques that are shaping the future of SoC design This is not just another technical book about what tools can do this is a guide for how engineers make tools work together to solve the complex challenges of today and tomorrow As we unchain physical design from traditional paradigms we empower the next generation of SoC designers to excel in an environment where creativity flexibility and methodology are as critical as the algorithms and hardware resources they rely on By the end of this journey you will not only understand the latest advancements in SoC physical design but also possess the practical skills to apply them effectively ensuring success in the fast paced ever changing world of next generation SoC development

Intelligent Planning for Civil Infrastructure: From Data-Driven Models to Execution Excellence Prof. Dr. Punit Goel, Dr. Subodh Sachan, Dr. K Yogesh, Niharika Singh, 2026-03-08 In today's fast evolving world urbanization is advancing at an unprecedented pace pushing the limits of civil infrastructure systems The immense scale of development and the increasing need for sustainable efficient and adaptive planning and execution are paramount The growing demand for robust

infrastructure calls for innovative methodologies that merge the power of data driven models with execution excellence Intelligent Planning for Civil Infrastructure From Data Driven Models to Execution Excellence emerges in response to this need offering a comprehensive guide for navigating the complexities of modern civil infrastructure planning This book integrates cutting edge technologies with proven project management principles offering a fresh perspective on how civil infrastructure projects can be managed from initial design through to completion As the challenges of urban planning and infrastructure development continue to grow the importance of intelligent data informed strategies has never been clearer By bringing together multidisciplinary research and real world applications this volume provides readers with insights into the evolving landscape of civil infrastructure planning The chapters of this book are designed to cover a broad range of essential topics each one addressing key aspects of infrastructure development Foundations of Civil Infrastructure Planning The journey begins with an exploration of the lifecycle phases of infrastructure projects the roles of various stakeholders and the regulatory frameworks that influence every stage of a project Data Driven Decision Making in Infrastructure Projects This chapter highlights how the effective collection validation and analysis of project data transforms uncertainty into actionable insights driving better decision making Demand Forecasting and Resource Allocation We explore quantitative forecasting techniques and optimization models that help align resources with future needs ensuring that infrastructure projects are equipped to handle demand fluctuations Integrated Project Scheduling Techniques A deep dive into project scheduling methods like CPM PERT and agile frameworks demonstrating how these techniques can be adapted to suit the complexities of large scale infrastructure projects AI and Machine Learning in Planning and Scheduling Here we unveil the role of artificial intelligence and machine learning in augmenting traditional planning approaches helping to enhance risk prediction optimize resource use and automate routine tasks Digital Twin Technology for Real Time Planning Adjustments This chapter introduces the concept of digital twins virtual replicas of physical assets and shows how they allow for real time updates and continuous refinements to project schedules Supply Chain Coordination and Material Logistics We focus on the strategies that ensure the seamless flow of materials from RFID tracking to vendor integration and modular construction methods Risk Assessment and Contingency Planning A framework for identifying assessing and mitigating risks throughout the life of a project ensuring that unexpected challenges do not derail progress or exceed budgets Stakeholder Communication and Collaboration Platforms This chapter explores the digital tools and collaborative platforms that enable transparency accountability and alignment among all project participants Case Studies in Mega Infrastructure Projects Through detailed case studies of landmark infrastructure projects we extract lessons on best practices innovation adoption and common pitfalls to avoid Sustainability and Green Planning Considerations The final chapter examines the environmental imperatives of infrastructure projects offering insights on integrating sustainability lifecycle costing and green standards into planning processes Each chapter is authored by domain experts who bring together theoretical knowledge with practical

experience It integrates decision support tables real world examples and case studies making it an invaluable resource for a variety of readers Whether you are an academic researcher a public or private project manager or a practitioner looking to adopt advanced digital tools this book will provide actionable frameworks to improve predictability enhance collaboration and promote sustainability in infrastructure projects Our hope is that the strategies and approaches detailed within these pages will inspire the next generation of infrastructure professionals to push the boundaries of what is possible ensuring that future projects not only meet the demands of modern society but also contribute to a sustainable and efficient built environment Through this book we aim to empower those involved in civil infrastructure planning to harness the full potential of data and technology ensuring excellence in both execution and impact
