Mastering Azure Machine Learning Christoph Körner, Kaijisse Waaijer, 2020-04-30 Master expert techniques for building automated and highly scalable end to end machine learning models and pipelines in Azure using TensorFlow Spark and Kubernetes Key Features Make sense of data on the cloud by implementing advanced analytics Train and optimize advanced deep learning models efficiently on Spark using Azure Databricks Deploy machine learning models for batch and real time scoring with Azure Kubernetes Service AKS Book Description The increase being seen in data volume today requires distributed systems powerful algorithms and scalable cloud infrastructure to compute insights and train and deploy machine learning ML models This book will help you improve your knowledge of building ML models using Azure and end to end ML pipelines on the cloud The book starts with an overview of an end to end ML project and a guide on how to choose the right Azure service for different ML tasks It then focuses on Azure Machine Learning and takes you through the process of data experimentation data preparation and feature engineering using Azure Machine Learning and Python You ll learn advanced feature extraction techniques using natural language processing NLP classical ML techniques and the secrets of both a great recommendation engine and a performant computer vision model using deep learning methods You ll also explore how to train optimize and tune models using Azure Automated Machine Learning and HyperDrive and perform distributed training on Azure Then you ll learn different deployment and monitoring techniques using Azure Kubernetes Services with Azure Machine Learning along with the basics of MLOps DevOps for ML to automate your ML process as CI CD pipeline By the end of this book you ll have mastered Azure Machine Learning and be able to confidently design build and operate scalable ML pipelines in Azure What you will learn Setup your Azure Machine Learning workspace for data experimentation and visualization Perform ETL data preparation and feature extraction using Azure best practices Implement advanced feature extraction using NLP and word

embeddings Train gradient boosted tree ensembles recommendation engines and deep neural networks on Azure Machine Learning Use hyperparameter tuning and Azure Automated Machine Learning to optimize your ML models Employ distributed ML on GPU clusters using Horovod in Azure Machine Learning Deploy operate and manage your ML models at scale Automated your end to end ML process as CI CD pipelines for MLOps Who this book is for This machine learning book is for data professionals data analysts data engineers data scientists or machine learning developers who want to master scalable cloud based machine learning architectures in Azure This book will help you use advanced Azure services to build intelligent machine learning applications A basic understanding of Python and working knowledge of machine learning are mandatory **Digit** ,2006 **Standard & Poor's Stock Reports** ,2005-10 **PC World** ,2007 **PC Gamer** ,2009

Machine Learning with C++ and TensorFlow CORWAN MARR,2026-02-07 Your Python machine learning model is brilliant but it s stuck in the lab When it comes to the real world in robotics game development or high speed trading Python s performance just won t cut it This is the production gap and this book is your hands on guide to bridging it Forget the bottlenecks We ll show you how to take that Python trained model and give it the raw speed and efficiency of production grade C This book goes beyond simple tutorials to give you a complete battle tested workflow for building AI systems that are not just intelligent but incredibly fast You ll start by mastering the challenging setup process and then build two professional grade projects from the ground up a real time object detection engine that analyzes your live webcam feed and a high throughput sentiment analysis API ready for the cloud Packed with practical examples advanced optimization techniques like TensorRT and modern deployment strategies using Docker this is the definitive guide for developers who are serious about performance It s time to turn your models into fast scalable and reliable applications Stop just training models start deploying them like a pro If you re ready to bridge the gap between research and production and become the engineer who delivers high performance AI this is the guide you ve been waiting for Order your copy today and build the skills that matter
