New York Times Saturday Book Review Supplement, 1939-05 **Hi Fi/stereo Review**, 1987 **American Brewers'**

Review, 1902 **The Measure of Progress** Diane Coyle, 2025-04 A book which explores how the digital transformation of the economy affects how we measure and interpret the true scale of innovation productivity and growth Statistics are an essential guide for better economic policies They also involve questions of freedom justice life and death as governments and increasingly machines use statistics to make decisions affecting people s lives This book argues that the conceptual framework underpinning today s economic statistics is out of date and makes it impossible to measure understand and respond to what is really happening in the economy According to Diane Coyle we have been interpreting the economy

through the lens of a statistical framework developed in the mid twentieth century when a lack of goods and services rather than natural resources was the binding constraint on growth when the intangible value of intellectual property and digital assets were largely unaccounted for and when the most pressing economic policy challenge was managing demand rather than supply Today s challenges are vastly different Growth in living standards in the rich economies has slowed significantly in recent decades despite dramatic innovation in digital technologies The geopolitical as well as the environmental landscape is fraught and our belief in democracy increasingly strained In *The Measure of Progress* Diane Coyle comprehensively explores how the digital transformation affects how we measure the economy and our capacity to interpret the true scale of innovation productivity and growth Her book also sets out some key principles for improving measurement A true understanding of the economy she argues will require different data collected in a different framework of categories and definitions Only then will policymakers businesses and individuals be able to shape a better sustainable future *The Volta Review* ,1951 **The New York Times Book Review** ,1979 Presents extended reviews of noteworthy books short reviews essays and articles on topics and trends in publishing literature culture and the arts Includes lists of best sellers hardcover and paperback *These Were People Once* Damien Huffer,Shawn Graham,2023-09-15 People buy and sell human remains online Most of this trade these days is over social media In a study of this bone trade how it works and why it matters the authors review and use a variety of methods drawn from the digital humanities to analyze the sheer volume of social media posts in search of answers to questions regarding this online bone trade The answers speak to how the 21st century understands and constructs heritage more generally each person their own expert yet seeking community and validation and like the major encyclopedic museums built on a kind of digital neocolonialist othering of the dead **Instrument Practice** ,1957 *Civic Engagement in Australian Democracy* Sarah Murray,Lachlan Umbers,2025-05-13 The Australian democratic system has long been regarded as one of the most stable and predictable in the world with an entrenched two party duopoly compulsory voting ensuring high levels of electoral participation and relatively high levels of satisfaction with the democratic process Yet the ways Australians engage with and participate in their democracy have shifted substantially in recent times While a record proportion of Australians are now on the electoral roll less than 1% belong to a political party and the share of Australians that have always voted for the same party in Federal elections has declined from 72% in 1967 to 37% in 2022 Turnout in the 2022 Federal Election fell below 90% for the first time since the introduction of compulsory voting in 1924 Over 50% of voters cast their ballots early in 2022 up from around 10% in 2004 The advent of social media has afforded Australians a range of opportunities for political engagement but has also given rise to serious concerns surrounding the dissemination of misinformation And Australians have also recently been afforded several historically rare opportunities for direct participation in the lawmaking process particularly the 2017 same sex marriage plebiscite and the 2023 referendum on the Aboriginal and Torres Strait Islander Voice to Parliament These developments give rise to a wide range of deep

difficult questions for Australian democracy many of which have been under explored What for instance does the failure of the referendum on the Aboriginal and Torres Strait Islander Voice to Parliament mean for Australian democracy What sorts of opportunities ought to be afforded to Australians for direct participation in government How might climate change impact Australian democracy in the coming decades How might the rise in early voting impact the character of Australian democracy What opportunities do Australians have for engagement in civic life and what obstacles do they face in exercising them This edited collection brings together specialists in the democratic process to consider such questions alongside many others Moreover the collection is uniquely interdisciplinary insofar as the contributors are drawn from a diverse range of fields law philosophy political science and sociology The chapters each help bring us a broader understanding of civic participation in Australian democracy in order that we might evaluate the status quo and gauge where it might be headed in the future

Computational Intelligence in Engineering and Project Management Pedro Yobanis Piñero Pérez, Janusz Kacprzyk, Rafael Bello Pérez, Iliana Pérez Pupo, 2024-02-19 This book is dedicated to all those interested in the application of artificial intelligence in engineering and project management Most of the jobs are focused on achieving agile project development New algorithms that combine various computational intelligence techniques are applied in different areas of knowledge in project management In this book computational intelligence is presented as the branch of AI that encompasses various techniques aimed at simulating human tolerance in decision making processes in environments with uncertainty and imprecision Among the precursor techniques of computational intelligence are evolutionary algorithms artificial neural networks fuzzy set theory and fuzzy systems However other areas such as the rough set linguistic data summary natural language processing the conversational systems fuzzy cognitive maps collective intelligence the neutrosophic theory and other fuzzy logic extensions are contributing to the application and extension of computational intelligence The book is organized into three parts as shown below The first part constitutes a critical review of computational intelligence in project management The second part presents new computational intelligence techniques and their applications in project planning control and monitoring processes In particular the use of conversational systems and their applicability in the agile management of portfolio programs and projects stand out Part three of the book exemplifies the use of computing techniques with words and other computational intelligence techniques for organizational decision making The authors of the book stand out for their extensive experience in the development of basic and applied applications of computational intelligence The authors Janusz Kacprzyk Pedro Y Pi ero P rez Rafael E Bello P rez and Iliana P rez Pupo have published several books associated with artificial intelligence and computational intelligence applied to projects They continue working on fundamental oriented and applied research on different artificial intelligence techniques to help with decision making in different areas of knowledge Authors would like to thank all the engineers professors and researchers without whose efforts this book could not have been written

International Broadcasting and Its Contested Role in Australian Statecraft

Geoff Heriot,2023-03-14 This book offers an insightful reappraisal of international broadcasting as discursive rather than soft power in service of democratic statecraft This at a time when issues of transnational media the credibility of news and the perils of disinformation and information warfare figure worryingly in public discourse Reflecting the perspective of middle power Australia author Geoff Heriot locates the strategic utility of multiplatform international broadcasting with reference to contemporary theories of soft hard smart power projection and intercultural communication He applies a fresh model of strategic analysis to the political history of Radio Australia examining the various external and internal variables that resulted in its flawed success in political communication during the late Cold War period

Children, Media, and Technology Erica Scharrer,2025-04-02 An accessible introduction to children media and technology that centers questions of access diversity equity and inclusion to provide a timely and much needed text for communication and media studies students and scholars This book covers several long standing as well as contemporary issues and controversies pertaining to media and youth such as violence cyberbullying and online harassment body image disturbances and beauty norms and responses to increasingly sophisticated marketing strategies It also fully explores the ways in which media and technology use enriches the lives of children and teens and empowers them with positive implications for their sense of self learning and education sociality friendships and respect for others and knowledge of and action in the world around them In each of these lines of inquiry up to date theory and research findings relevant to diverse young media users and questions of access equity representation and inclusion make this a distinct approach to enhance students understanding of children media and technology This is an essential text for students of Media and Communication Studies taking courses such as Children and Media Children Teens and Media and Children Adolescents and Media as well as similar classes being taught in related departments
