devices The iPhone software or iOS works specifically with your iPhone Starting in 2019 Apple renamed the Apple Watch

versions of watchOS 7 and iOS14 There may be some discrepancies when the public version is released and I ll update the
book at that time You know that feeling you get when you have a cool new gadget Your Apple Watch hardware may not have
changed but these software upgrades mean in a lot of ways you do have that cool new gadget Whether you have the latest
Apple Watch or an older model most of these new features work with your watch What can you expect to find in this book

and find what you want when you want it Over 100 third party apps will inspire you to try new things on your watch A few of
the categories include entertainment productivity sports photography and games We ll also cover integration platforms like
Siri Shortcuts and IFTTT which open up the possibility of unlimited applications Focus on the engineering and Apple

HomeKit SiriKit and GymKit platforms to enhance your experience for years to come There are lots of demonstrations to
showcase the cool and awe inspiring features of the Apple Watch These aren t random tips and tricks Rather I have
showcased them in a way that lets you find them while exploring a particular feature or topic A List of 30 Common
Troubleshooting and Maintenance Suggestions While you can use your Apple Watch with watchOS 6 and later without your
iPhone nearby the Apple iPhone is an integral part of setting up your watch and your day to day experience I ve included an
iPhone chapter covering the iPhone setup screens gestures and the iPhone apps you are likely to use related to your Apple
Watch Organizing this chapter is a bit of a challenge I don t want to interrupt the flow of Apple Watch details so I added
comments that refer to the appropriate topic in the iPhone Chapter If it s not important to you skip over the comments As a

final selling point I make an intentional effort to include complete step by step instructions In earlier books readers frequently comment they like this approach For example if my instructions say tap here you won t be left wondering tap where Rest assured I ll explain exactly which device app screen and even how you touch the screen which is also relevant to the Apple Watch Are you ready for the Apple Watch experience Let s get started
