Now available in a single volume, the ninth edition of this market leading text continues an evolution toward a user orientation. Following market demand, a corporate approach, more conceptual framework, and many new pedagogical elements have been implemented to better develop the student's abilities to understand and use accounting information in the role of decision maker. All aspects of this textbook and its supporting ancillaries have been carefully evaluated and revised to create a more user friendly, dynamic text while retaining the foundation that has made it so successful throughout the years.

Audit Quality Jonas Tritschler, 2013-10-31. Arising from the author's experience as a practicing CPA, this book is quite different from other research in this field as it confronts the subject of audit quality from a pragmatic perspective. The first goal of Jonas Tritschler is to develop an audit quality metric on national audit firm level. Financial reporting errors as detected by the German enforcement institutions during examinations, which subsequently are published in the German Federal Gazette by the involved companies, are the data basis for this measurement. Using the developed audit quality metric, the second goal of this study is to analyze audit quality differences of selected audit firms by comparing their deployed audit input factors such as employee's competence ratio of certified professionals to total audit staff, experience of employees, average tenure of employees in years, and client specific experience, client fluctuation rate. Results indicate a correlation between audit quality according to the developed metric and the operationalized audit input factors mentioned above.

You Report to Me David Bernhardt, 2024-10-22. In this firsthand account, David Bernhardt, 53rd Secretary of the United States Department of the Interior, describes how he witnessed firsthand the administrative state's transformation from a collection of departments under the command of the President into a sprawling and unaccountable bureaucracy. Resistance to the Trump presidency within the civil service drew media attention, but it was only part of a larger problem: a federal bureaucracy that often goes its own way, contrary to the

policies of elected leadership In this insider's account David L. Bernhardt reveals how the bureaucratic swamp really operates and how unaccountable power has been concentrated deep within the administrative state resulting in dysfunction Executive agencies were created to implement legislation and presidential directives yet career civil servants use them to advance their own agendas instead Congress often writes laws broadly letting subject matter experts at administrative agencies fill in the details with regulations Then agency employees sometimes substitute their own policy preferences for actual statutory or regulatory language They may also fail to appreciate that their authority is delegated from an official who answers to the president Bernhardt gives examples of federal employees undermining the administration's policies simply by refusing to work on a task slow walking it or doing a subpar job Administrative agencies have further gained power through judicial deference to an agency's own interpretation of a statute when its enforcement action is challenged Courts essentially abdicate their role of interpreting the law leaving citizens with little recourse against penalties or prohibitions Both legislative and judicial powers have thus been shifted to the executive branch where they are exercised without adequate political oversight Drawing on his experiences working under two administrations Bernhardt explains how President Trump's enabling leadership showed a path for reining in the administrative state He calls on political leadership to turn off autopilot and take control of their agencies and on Congress and the judiciary to assert their constitutional authority before an unaccountable federal bureaucracy destroys the Founders' vision of government by consent of the governed

Enron Nancy B. Rapoport, Bala G. Dharan, 2004 This law school text explores the Enron debacle from a variety of different aspects Essays analyze the business government interactions and decisions that laid the foundations for Enron's growth and subsequent demise Other essays describe and detail the complex web of partnerships and accounting tricks used by Enron to hide bad news and project good news While other essays focus on the ethical and legal dimensions of the Enron crisis and their lessons for business and law students as well as for society
