ABSTRACT

Industrial globalization presents the need for companies to expand into new territories world-wide. Research has attributed difficulties in doing so largely to problems and difficulties in the process of knowledge transfer, and has recently pinpointed the essential role of implementing knowledge from other parts of the world, and the learning required to do so. Knowledge transfer is a circular process; MNCs gather knowledge from business partners, and then apply it back to doing business with these or other business partners. In this process, knowledge application (which can be called as 'implementation') plays an essential role; it determines the effectiveness of knowledge transfer, without which, MNCs cannot develop and possibly
