## **Connectography Mapping The Future Of Global Civilization:**

*Connectography* Parag Khanna, 2016-04-19 From the visionary bestselling author of *The Second World and How to Run the World* comes a bracing and authoritative guide to a future shaped less by national borders than by global supply chains a world in which the most connected powers and people will win Connectivity is the most revolutionary force of the twenty first century Mankind is reengineering the planet investing up to ten trillion dollars per year in transportation energy and communications infrastructure linking the world's burgeoning megacities together This has profound consequences for geopolitics economics demographics the environment and social identity Connectivity not geography is our destiny In *Connectography* visionary strategist Parag Khanna travels from Ukraine to Iran Mongolia to North Korea Pakistan to Nigeria and across the Arctic Circle and the South China Sea to explain the rapid and unprecedented changes affecting every part of the planet He shows how militaries are deployed to protect supply chains as much as borders and how nations are less at war over territory than engaged in tugs of war over pipelines railways shipping lanes and Internet cables The new arms race is to connect to the most markets a race China is now winning having launched a wave of infrastructure investments to unite Eurasia around its new Silk Roads The United States can only regain ground by fusing with its neighbors into a super continental North American Union of shared resources and prosperity *Connectography* offers a unique and hopeful vision for the future Khanna argues that new energy discoveries and technologies have eliminated the need for resource wars ambitious transport corridors and power grids are unscrambling Africa's fraught colonial borders even the Arab world is evolving a more peaceful map as it builds resource and trade routes across its war torn landscape At the same time thriving hubs such as Singapore and Dubai are injecting dynamism into young and heavily populated regions cyber communities empower commerce across vast distances and the world's ballooning financial assets are being wisely invested into building an inclusive global society Beneath the chaos of a world that appears to be falling apart is a new foundation of connectivity pulling it together Praise for *Connectography* Incredible With the world rapidly changing and urbanizing Khanna's proposals might be the best way to confront a radically different future *The Washington Post* Clear and coherent a well researched account of how companies are weaving ever more complicated supply chains that pull the world together even as they squeeze out inefficiencies He has succeeded in demonstrating that the forces of globalization are winning *Adrian Woolridge* *The Wall Street Journal* Bold With an eye for vivid details Khanna has produced an engaging geopolitical travelogue *Foreign Affairs* For those who fear that the world is becoming too inward looking *Connectography* is a refreshing optimistic vision *The Economist* Connectivity has become a basic human right and gives everyone on the planet the opportunity to provide for their family and contribute to our shared future *Connectography* charts the future of this connected world *Marc Andreessen* general partner *Andreessen Horowitz* Khanna's scholarship and foresight are world class A must read for the next president *Chuck Hagel* former U S secretary of defense This title has complex layouts that may take longer to download [Atlas of](#)

Forecasts Katy Börner,2021-08-31 Forecasting the future with advanced data models and visualizations To envision and create the futures we want society needs an appropriate understanding of the likely impact of alternative actions Data models and visualizations offer a way to understand and intelligently manage complex interlinked systems in science and technology education and policymaking Atlas of Forecasts from the creator of Atlas of Science and Atlas of Knowledge shows how we can use data to predict communicate and ultimately attain desirable futures Using advanced data visualizations to introduce different types of computational models Atlas of Forecasts demonstrates how models can inform effective decision making in education science technology and policymaking The models and maps presented aim to help anyone understand key processes and outcomes of complex systems dynamics including which human skills are needed in an artificial intelligence empowered economy what progress in science and technology is likely to be made and how policymakers can future proof regions or nations This Atlas offers a driver s seat perspective for a test drive of the future *Sovereignty Blockchain 2.0* Lian Yuming,2022-09-05 This book is a continuation and deepening of *Sovereign Blockchain 1.0* It mainly includes three views 1 Blockchain is a super public product based on digital civilization 2 The Internet is an advanced level of industrial civilization the core of which is connection blockchain is an important symbol of digital civilization the essence of which is reconstruction 3 Digital currency will trigger a comprehensive change in the economic field and digital identity will reconstruct the governance model in the social field thereby changing the order of civilization This book is not only a popular science book based on blockchain thinking theory and application research but also a scholarly work on the technical and philosophical issues of governance and the future By reading *Sovereign Blockchain 2.0* policymakers can quickly understand the basic knowledge and frontier dynamics of science and technology science and technology workers can grasp the general trend seize opportunities face problems and difficulties aim at the world s science and technology frontier and lead the direction of science and technology development experts and scholars in law and legal fields can see new ideas concepts and models of data governance social science researchers can discover data sociology and data philosophy issues

**Connectography** Parag Khanna,2016-04-19 Which lines on the map matter most It is time to reimagine how life is organized on Earth We re accelerating into a future shaped less by countries than by connectivity A world in which the most connected powers and people will win In *Connectography* Parag Khanna guides us through the emerging global network civilization in which mega cities compete over connectivity and borders are increasingly irrelevant He travels from Ukraine to Iran Mongolia to North Korea London to Dubai and the Arctic Circle to the South China Sea all to show how twenty first century conflict is a tug of war over pipelines and internet cables advanced technologies and market access Yet *Connectography* offers a hopeful vision of the future Khanna argues that new energy discoveries and innovations have eliminated the need for resource wars global financial assets are being deployed to build productive infrastructure that can reduce inequality and frail regions such as Africa and the Middle East are unscrambling their fraught colonial borders

through ambitious new transportation corridors and power grids Beneath the chaos of a world that appears to be falling apart is a new foundation of connectivity pulling it together *The Lost Future* Jan Zielonka,2023-01-01 A timely and compelling argument for a revitalized and restructured global politics The future seems increasingly uncertain Our democracies are failing to prevent financial crises energy shortages climate change and war so how can we look to the future with confidence Jan Zielonka argues that it is democracy s shortsightedness that makes politics stumble in our increasingly connected world With our governments still confined to the borders of nation states defending the short term interests of present day voters the consequences for future generations are dire In this incisive account Zielonka makes a bold case for a new politics of time and space He considers how democracy should adjust to the world of high speed and he questions our everyday experiences as citizens Is it acceptable for authorities and firms to monitor our whereabouts Why is the distribution of time and space so unequal And most crucially can we construct a new system of governance that will allow us to plan ahead with certainty

**The Future Is Asian** Parag Khanna,2019-02-05 In the 19th century the world was Europeanized In the 20th century it was Americanized Now in the 21st century the world is being Asianized The Asian Century is even bigger than you think Far greater than just China the new Asian system taking shape is a multi civilizational order spanning Saudi Arabia to Japan Russia to Australia Turkey to Indonesia linking five billion people through trade finance infrastructure and diplomatic networks that together represent 40 percent of global GDP China has taken a lead in building the new Silk Roads across Asia but it will not lead it alone Rather Asia is rapidly returning to the centuries old patterns of commerce conflict and cultural exchange that thrived long before European colonialism and American dominance Asians will determine their own future and as they collectively assert their interests around the world they will determine ours as well There is no more important region of the world for us to better understand than Asia and thus we cannot afford to keep getting Asia so wrong Asia s complexity has led to common misdiagnoses Western thinking on Asia conflates the entire region with China predicts imminent World War III around every corner and regularly forecasts debt driven collapse for the region s major economies But in reality the region is experiencing a confident new wave of growth led by younger societies from India to the Philippines nationalist leaders have put aside territorial disputes in favor of integration and today s infrastructure investments are the platform for the next generation of digital innovation If the nineteenth century featured the Europeanization of the world and the twentieth century its Americanization then the twenty first century is the time of Asianization From investment portfolios and trade wars to Hollywood movies and university admissions no aspect of life is immune from Asianization With America s tech sector dependent on Asian talent and politicians praising Asia s glittering cities and efficient governments Asia is permanently in our nation s consciousness We know this will be the Asian century Now we finally have an accurate picture of what it will look like *Uses and Misuses of International Economic Law* Moritz J. K. Blenk,2022-09-12 Standardization is a classic form of rulemaking Nonetheless it is notoriously diffuse and gives rise to

questions and debate in particular over the standards normativity legitimacy and nature whether public or private national or international Moritz J K Blenk applies a policy orientated approach to international law to comparatively analyze the role of private rulemaking within the context of international economic integration in the World Trade Organization and the European Union He thereby aims to elucidate the opaque phenomenon of private standardization from a legal perspective and more profoundly shed new light on economic integration

**Inventing Future Cities** Michael Batty, 2018-12-11 How we can invent but not predict the future of cities We cannot predict future cities but we can invent them Cities are largely unpredictable because they are complex systems that are more like organisms than machines Neither the laws of economics nor the laws of mechanics apply cities are the product of countless individual and collective decisions that do not conform to any grand plan They are the product of our inventions they evolve In *Inventing Future Cities* Michael Batty explores what we need to understand about cities in order to invent their future Batty outlines certain themes principles that apply to all cities He investigates not the invention of artifacts but inventive processes Today form is becoming ever more divorced from function information networks now shape the traditional functions of cities as places of exchange and innovation By the end of this century most of the world's population will live in cities large or small sometimes contiguous and always connected in an urbanized world it will be increasingly difficult to define a city by its physical boundaries Batty discusses the coming great transition from a world with few cities to a world of all cities argues that future cities will be defined as clusters in a hierarchy describes the future high frequency real time streaming city considers urban sprawl and urban renewal and maps the waves of technological change which grow ever more intense and lead to continuous innovation an unending process of creative destruction out of which future cities will emerge

**Chinese Way, The: Overcoming Challenges For A Shared Future** Fabio Massimo Parenti, 2023-07-07 The book aims to communicate to readers in a clear fluent and well documented fashion the new role that China plays in the geography of world power evaluating its weight influence and impact on future developments China's ambition and its vision of international affairs can be summed up in Beijing's desire to build a community of common destiny for mankind Behind this concept lies the desire to present itself as a peaceful nation interested in a common global development in full compliance with the principles embraced by the United Nations to be achieved through win win relationships capable of bringing mutual benefits to the actors engaged in international cooperation China has experienced extraordinary growth in recent decades and intends to continue carving out the space it deserves in various international fora According to the author this does not necessarily represent a threat as its Western detractors contend given the People's Republic's intention to achieve its goals through mutual respect spatial interconnection and long term productive investments The book has been published in Italy by Meltemi and is in course of publication by the Chinese publisher New Star Press Those who deal with China are well aware that the West's gaze on the People's Republic has often been dismissive superficial and distorted A sort of festival of stereotyped opinions with value

judgments constantly used to highlight the West's alleged superiority vis vis the Chinese model Regardless of whether one likes the Chinese political economic system or not no country can avoid engaging with it Especially if we consider that the exhaustion of the propulsive thrust of Western globalization is increasingly evident and corresponds conversely to the rise of a new constructive globalization with Chinese characteristics Fabio Massimo Parenti Youtube Author's commentary

**Securing Our Future** Ola Dahlman, 2025-05-28 In an era marked by escalating global crises climate change cyber threats pandemics and nuclear weapons proliferation this book introduces a science based approach to security and global threats It underscores the necessity of interdisciplinary science and technology to ensure that decisions and actions are grounded in knowledge This vision seeks to inspire promote and facilitate collaboration across all sectors of global society Building resilient societies and effectively addressing global threats will require substantial resources Can we afford to save the Earth Can we afford not to Four Key Elements A Science Based Approach to Security and Global Threats The book is structured around two key chapters an opening chapter that outlines this new vision and a concluding chapter that reflects on how to translate that vision into actionable steps Evolution of Earth and Society A review of the development of our planet leading to modern society with a discussion on global demography and the economy critical components of global security and resilience Key Global Communities An introduction to five global communities states cities the business and scientific communities and civil society It examines how each can contribute to building security and assesses their vulnerabilities to various threats Major Human Created Threats A discussion of five large scale threats created by human activity or arising from human interaction with nature global warming natural disasters biopandemics nuclear weapons and cyber threats This book serves as a call for informed collaborative action to address the pressing global challenges of our time **Social Sciences Research Journal**, 2016 States and Societies in Motion Boo Teik Khoo, Jafar Suryomenggolo, 2021 With contributions from leading scholars in their field this collection of fourteen essays offers wide ranging but incisive perspectives on East and Southeast Asian Studies Apart from informing and enlightening the reader the essays offer a tribute to Professor Takashi Shiraishi the renowned Japanese scholar for his many contributions across continents and disciplines as well as his personal qualities as a long time colleague teacher and friend Now Professor Emeritus of the National Graduate Institute for Policy Studies GRIPS in Tokyo Shiraishi sensei has had an outstanding career as a teacher scholar administrator and policy advisor his many roles including Director of the Southeast Asia Program at Cornell University and president both of GRIPS and the Institute of Developing Economies Japan Often with Japan at their nexus the essays speak to three enduring themes in the research interests that spanned Shiraishi's half century career namely political movements in Southeast Asia national and regional politics in China and Japan and the links between ideology networks and policies at critical junctures of state formation An introduction by the editors reviews Shiraishi's contributions to many areas of scholarship these are documented in the back matter in a bibliography of his publications and writings in English and Japanese Among authors of

the fourteen essays that follow are Patricio Abinales Chris Baker Caroline Hau Peter Katzenstein Pasuk Phongpaichit and Thongchai Winichakul In a concluding lengthy interview Shiraishi speaks for the first time in a frank if light hearted tone of his diverse experiences in academia as student faculty and administrator his thoughts on area studies and their connections with official policy making and his initiatives for building regional networks of research and intellectual exchange A festschrift in English being a rarity for a Japanese scholar this collection offers valuable if indirect insights into the links and influences that have animated a burgeoning community of international academic exchange and expert cooperation This has been facilitated by Shiraishi s position time and again even if an accidental one as he likes to say as a transnational intersection point for colleagues students and friends in their many various research pursuits A rich and rewarding collection

*Move* Parag Khanna,2022-10-04 In the 60 000 years since people began colonizing the continents a continuous feature of human civilization has been mobility History is replete with seismic global events pandemics and plagues wars and genocides Each time after a great catastrophe our innate impulse toward physical security compels us to move The map of humanity isn t settled not now not ever The filled with crises 21st century promises to contain the most dangerous and extensive experiment humanity has ever run on itself As climates change pandemics arrive and economies rise and fall which places will people leave and where will they resettle Which countries will accept or reject them How will the billions alive today and the billions coming paint the next map of human geography Until now the study of human geography and migration has been like a weather forecast *Move* delivers an authoritative look at the climate of migration the deep trends that will shape the grand economic and security scenarios of the future For readers it will be a chance to identify their location on humanity s next map

Technocracy in America Parag Khanna,2017-01-10 American democracy just isn t good enough anymore A costly election has done more to divide American society than unite it while trust in government and democracy itself is plummeting But there are better systems out there and America would be wise to learn from them In this provocative

manifesto globalization scholar Parag Khanna tours cutting edge nations from Switzerland to Singapore to reveal the inner workings that allow them that lead the way in managing the volatility of a fast changing world while delivering superior welfare and prosperity for their citizens The ideal form of government for the complex 21st century is what Khanna calls a direct technocracy one led by experts but perpetually consulting the people through a combination of democracy and data From a seven member presidency and a restructured cabinet to replacing the Senate with an Assembly of Governors Technocracy in America is full of sensible proposals that have been proven to work in the world s most successful societies Americans have a choice for whom they elect president but they should not wait any longer to redesign their political system following Khanna s pragmatic vision

*Splinternet* Scott Malcomson,2016-03-17 This is not your ordinary history of the Internet Scott Malcomson has brilliantly extended the connections between Silicon Valley and the military back far beyond DARPA back in fact to World War I If you want to understand the conflict between cyberspace utopians and the states and corporations who seek to dominate our virtual lives you ve got to read this book James Ledbetter editor Inc Magazine In elegant prose powered by deep research and with a surprisingly vivid cast of characters Scott Malcomson shows how profound the relationship is between the state and the Internet As major powers try to assert control over the Web *Splinternet* illuminates both how we got to this point and how to move forward Parag Khanna global contributor CNN and author of *Connectography Mapping the Future of Global Civilization* There s always been something universalizing about the Internet The World Wide Web has seemed both inherently singular and global a sort of ethereal United Nations But today as Scott Malcomson contends in this concise brilliant investigation the Internet is cracking apart into discrete groups no longer willing or able to connect The implications of this shift are momentous Malcomson traces the way the Internet has been shaped by government needs since the 19th century above all the demands of the US military and intelligence services From World War I cryptography and spying to weapons targeting against Hitler and then Stalin the monolithic aspect of the digital network was largely determined by its genesis in a single state sponsored institution In the 1960s internationalism and openness were introduced by the tech pioneers of California s counter culture the seed bed for what became Google Microsoft Facebook and Apple But in the last 15 years security concerns of states and the privatizing impetus of e commerce have come to the fore and momentum has shifted in a new direction towards private walled domains each vying with the other in an increasingly fragmented system in effect a *Splinternet* Because the Internet today surrounds us so comprehensively it s easy to regard the way it functions as a simple given part of the natural order of things Only by stepping back and scrutinizing the evolution of the system can we see the Internet for what it is a contested protean terrain constantly evolving as different forces intervene to drive it forward In that vital exercise Malcomson s elegant erudite account will prove invaluable

**Connectography** Parag Khanna,2016-09-29T00:00:00+02:00 Dalla sua citt di residenza Singapore il famoso stratega geopolitico indiano Parag Khanna si spostato verso le mete pi disparate dall Ucraina all Iran dalle miniere della

Mongolia a Nairobi dalle coste atlantiche al circolo polare artico Grazie ai suoi viaggi ha avuto modo di osservare i mutamenti epocali che stanno investendo il mondo Migrazioni megalopoli Zone Economiche Speciali comunicazioni e cambiamenti climatici stanno ridisegnando la geografia planetaria gli Stati non sono pi definiti dai loro confini bens dai flussi di persone e di legami finanziari commerciali ed energetici che quotidianamente li attraversano In questo scenario anche lo scontro fra potenze assume nuove forme trasformandosi in un forsennato tiro alla fune gli eserciti vengono usati tanto per difendere i territori quanto le risorse e le infrastrutture che vi sono custodite Sono i prodromi della definitiva scomparsa delle guerre Connectography che chiude la trilogia di cui I tre imperi e Come si governa il mondo sono i primi due volumi una mappa dettagliatissima che non solo ci offre una lucida analisi del presente ma ci propone una visione molto ottimistica del futuro che ci attende un mondo in cui le linee che lo connettono sono molte di pi di quelle che lo separano A chi teme che il mondo stia diventando sempre pi chiuso Connectography offre una nuova prospettiva pi ottimistica The Economist La lungimiranza e l erudizione di Parag Khanna sono impareggiabili il futuro presidente degli Stati Uniti far bene a leggere questo libro Chuck Hagel ex segretario della Difesa USA Si tratta forse del libro pi globale mai scritto specifico in maniera impressionante mantenendo l analisi su ampia scala Se le infrastrutture determinano il destino del mondo allora per capire dove il futuro dirige il suo corso basta seguire le reti delle supply chain descritte in questo libro Kevin Kelly Wired [Move](#)
