**Crosby vs. Ovechkin vs. McDavid vs. Gretzky** Jason M. Walker, 2019-12-15 Hockey has long been one of most prominent sports in North America. Since its rise in popularity in the twentieth century many have asked who is the greatest hockey player of all time. From National Hockey League legends like Wayne Gretzky to modern day stars like Sidney Crosby, Alexander Ovechkin, and Connor McDavid many players have written their name into the record books. Whether by goals scored or championships won each has made their case on the ice. In this engaging and unique volume the argument is made using math and statistical analysis to answer the age old questions of greatness.

**Economic Analysis of the Digital Economy** Avi Goldfarb, Shane M. Greenstein, Catherine Tucker, 2015-05-08 There is a small and growing literature that explores the impact of digitization in a variety of contexts but its economic consequences surprisingly remain poorly understood. This volume aims to set the agenda for research in the economics of digitization with each chapter identifying a promising area of research. Economics of Digitization identifies urgent topics with research already underway that warrant further exploration from economists. In addition to the growing importance of digitization itself digital technologies have some features that suggest that many well studied economic models may not apply and indeed so many aspects of the digital economy throw normal economics in a loop. Economics of Digitization will be one of the first to focus on the economic implications of digitization and to bring together leading scholars in the economics of digitization to explore emerging research.

Data-centric Approaches to Industrial Decisions P. K. Kapur, Omar Alhazmi, Shakshi Singhal, 2025-07-30 This book explores mathematical modeling, predictive analytics, and interdisciplinary tools in formulating, implementing, and evaluating industrial strategies. This book presents cutting edge research that intersects advanced computational techniques with practical decision making across industries. This edited book showcases a curated collection of peer reviewed contributions from international scholars and practitioners addressing the growing complexity of business decisions in the era of big data, AI, and digital transformation. From cyber physical systems to sustainability, analytics, and business intelligence each chapter provides a robust academic foundation while offering real world implications for policymakers, managers, and researchers. With a focus on actionable insights the book is a vital reference for operations, research, analytics, and digital strategy professionals and an enriching resource for postgraduate and doctoral scholars across business and engineering disciplines.

**Fortune and Misfortune in the Ancient Near East** Olga Drewnowska, Małgorzata Sandowicz, 2017-01-03 In the week between July 21 and 25 2014 the University of Warsaw hosted more than three hundred Assyriologists from all over the world. In the course of five days nearly 150 papers were read in three and sometimes four parallel sessions. Many of them were delivered within the framework of nine thematic workshops. The publication of most of these panels is underway in separate volumes. As is usually the case the academic sessions were accompanied by many opportunities for social interaction.
