Tiktok How To Tutorial:

Entertained or Else Tina Kendall, 2025-09-18 This book considers the complex and often contradictory relations that are forged between boredom and everyday media use in the twenty first century and demonstrates how networked media have developed new technical means of capitalizing on boredom s state of suspension to make it into a source of value creation Focusing on the discursive technological and affective structures that encourage users to be entertaining and to remain entertained the book analyses how boredom has been increasingly instrumentalized as both an individual mood and a wider structure of feeling that drives participation across media networks It identifies the range of cultural techniques for codifying classifying sensing and pre empting boredom as well as those that teach users counter intuitively to embrace boring media as a means of coping with the intensities of always on existence However if boredom is positioned in a digital network culture as a feeling that keeps driving us back to our social media feeds it is important to ask how else it might operate While the technological affordances of computational media have put pressure on our ability to conceive of boredom as a radical challenge to digital capitalism this book attempts to think about the potential that might still be embedded in boredom s capacity to temporarily suspend or to neutralize dominant structures of attention and affect Building on the work of Giorgio Agamben Byung Chul Han Roland Barthes and from historical accounts of boredom and entertainment the book provides a new understanding of boredom in the context of networked media *Social Media in the Changing Mathematics Classroom* Johann Engelbrecht, Greg Oates, Marcelo de Carvalho Borba, 2025-04-16 This edited volume gathers contributions from international scholars focusing on social media s role and impact on mathematics education Social media s integration into pedagogical strategies from social networking sites to video sharing platforms offers the opportunity to enhance learning by fostering connectivity and engagement among students ultimately improving mathematical understanding in educational settings This text aims to provide guidance on the facilitation of peer learning and collaboration as well as highlighting the necessary shift in traditional methods to include cyber assistance in the learning process The book discusses how social media aligns with social constructivist theories of learning its consistency with the process of developing students into independent learners and provides means to ensuring educators remain relevant and connected to students preferred modes of learning Challenges and benefits of the use of social media tools in teaching are also detailed Examining the potential for effective integration of social media in the classroom this book is a valuable resource for educators practitioners and researchers interested in mathematics education Postdevelopmental Approaches to Digital Arts in Childhood Marissa McClure Sweeny, Mona Sakr, 2025-01-23 This book deconstructs traditional developmentalist logic around children s engagement with digital media where the focus is on what the digital does to children s bodies and brains Rather than seeing children as vulnerable and passive recipients the authors position children as co creators and digital artists embracing the richness of children s digital play The chapters cover a wide range of topics including indigenous digital art digital drawing

learning to code social media and artificial intelligence The authors use a diverse range of theoretical perspectives including posthumanism feminist new materialism social semiotics socialcultural and multimodal approaches to childhood to generate new ways of seeing the relationship between children and the digital The book includes chapters from academics and practitioners based in Australia Canada Sweden the UK and the USA and a companion website showcasing innovative and interactive material including visual essays and soundscapes

Chorus: Sonic Politics of the Carnavalesque in Tragic Times Carlos Garrido Castellano,2026-12-08 Chorus Sonic Politics of the Carnavalesque in Tragic Times posits the carnivalesque as a fertile laboratory to understand and go past our crisis driven contemporaneity The book engages with sound and noise from C diz one of the capital cities of carnival in Spain to situate carnivalesque mobilisation as a vibrant platform where our capacity to redemocratise our societies and to envisage liveable futures is revitalised Chorus argues that the connection between freedom and carnival carnival being a parenthesis that liberates individual subjectivity has to be profoundly rethought as freedom and spontaneity have become part of neoliberal governability Chorus demonstrates that carnival music is crucial to understand collective ways of being and acting in common ways that go beyond the structured and established avenues of formal parliamentary politics Carnival music is also essential to understand and move beyond a carnivalised politics laughter being simultaneously used to open and curtail public debate neo conservative jester kings that are ascending to power and a long etcetera More importantly carnival sonics is a public intervention that brings its own situated practice based thinking In Chorus I argue that participating in carnival groups implies acting and being in public politically
