**Trends and Innovations in Information Systems and Technologies** Álvaro Rocha,Hojjat Adeli,Luís Paulo Reis,Sandra Costanzo,Irena Orovic,Fernando Moreira,2020-06-07 This book gathers selected papers presented at the 2020 World Conference on Information Systems and Technologies WorldCIST 20 held in Budva Montenegro from April 7 to 10 2020 WorldCIST provides a global forum for researchers and practitioners to present and discuss recent results and innovations current trends professional experiences with and challenges regarding various aspects of modern information systems and technologies The main topics covered are A Information and Knowledge Management B Organizational Models and Information Systems C Software and Systems Modeling D Software Systems Architectures Applications and Tools E Multimedia Systems and Applications F Computer Networks Mobility and Pervasive Systems G Intelligent and Decision Support Systems H Big Data Analytics and Applications I Human Computer Interaction J Ethics Computers K Health Informatics L Information Technologies in Education M Information Technologies in Radiocommunications and N Technologies for Biomedical Applications

*Cumulative Effect* Vladas Leonas,2026-04-09 For years cyber security was the poor relation in many boardrooms treated as inferior to other priorities seen as an irritating cost centre and assumed to be money that could be spent better elsewhere That mindset is rarely the result of a single bad decision It is inertia the cumulative effect of multiple factors and above all a lack of understanding of how dramatically the landscape has changed over the past 25 years This book is written as a practical wake up call for Board Members and CEOs It reframes cyber security as a leadership issue rooted in the inherent insecurities of the internet on which modern organisations are built encouraging leaders to think as if they operate in a high crime area It then shows how to translate that mindset into board level oversight strengthening domain and subdomain controls and certificate management expanding organisational KPIs to include correctly chosen cyber measures such as year on year reduction in IT ecosystem complexity and making explicit decisions about unmanaged devices

such as BYOD and home computers The book also introduces a cyber security risk reward lens for business cases reshaping how leaders assess digital transformation agile delivery SaaS sprawl and shadow IT It clarifies shared security responsibility and how to implement and manage it properly then broadens the conversation to supply chain cyber risks and dependencies across all vendors and service providers not just IT It highlights the strategic importance of DNS ownership and management examines the cyber implications of reliance on digital monopolies such as Microsoft or CrowdStrike and makes clear that compliance does not equal security standards and frameworks may help but they do not guarantee real security Finally it tackles modern boardroom pressure points including avoiding FOMO driven decisions assessing AI adoption through a cyber risk lens and planning for post quantum cryptography

Textual Intelligence Meenakshi Malik, Preeti Sharma, Susheela Hooda, 2025-07-23 The book is a must have resource for anyone looking to understand the complexities of generative AI offering comprehensive insights into LLMs effective training strategies and practical applications Textual Intelligence Large Language Models and Their Real World Applications provides an overview of generative AI and its multifaceted applications as well as the significance and potential of Large Language Models LLMs including GPT and LLaMA It addresses the generative AI project lifecycle challenges in existing data architectures proposed use case planning and scope definition model deployment and application integration Training LLMs data requirements for effective LLM training pre training and fine tuning processes and navigating computational resources and infrastructure are also discussed The volume delves into in context learning and prompt engineering offering strategies for crafting effective prompts techniques for controlling model behavior and output quality and best practices for prompt engineering Textual Intelligence Large Language Models and Their Real World Applications also discusses cost optimization strategies for LLM training aligning models to human values optimizing model architectures the power of transfer learning and fine tuning instruction fine tuning for precision and parameter efficient fine tuning PEFT with adapters such as LoRA QLoRA and soft prompts making it an essential guide for both beginners and industry veterans Readers will find this book Explores the real world potential of large language models Introduces industry changing AI solutions Provides advanced insights on AI and its models Audience Industry professionals academics graduate students and researchers seeking real world solutions using generative AI
