**The Anxiety Workbook for Supporting Teens Who Learn Differently** Clare Ward, James Galpin, 2021-04-21 The teenage years are associated with high levels of uncertainty and anxiety compounded by academic and social demands and physical and emotional changes. They can be especially tough for teenagers who learn differently. This workbook contains a host of practical activities for teachers and other adults supporting young people with learning differences, whether at home or in the classroom. Drawing on their years of first-hand experience and up-to-the-minute research, the authors outline a trans-diagnostic framework for identifying what might be behind a student's behaviour. They show how the first crucial step all practitioners must take is to work out what could be causing a teen's feelings of anxiety or uncertainty and how this can be addressed. The activities in this workbook are organised into three sections, each addressing one of the three key areas where anxiety or uncertainty can be found: the structural, sensory, and social domains. The tried and tested worksheets and activities present a much-needed alternative to a diagnosis-led approach. They can be used with any teenager, with or without a diagnosis, in classroom settings, intervention groups, or one-to-one work. The Anxiety Workbook will help you to really understand and address the needs of the SEN students you support, thereby improving their well-being, confidence, and self-esteem and empowering them to get the most out of their education.
