

5 TIPS TO IMPROVE YOUR MENTAL HEALTH

by Beth Greenwood, MD

Regional Medical Director - VP Medical Affairs

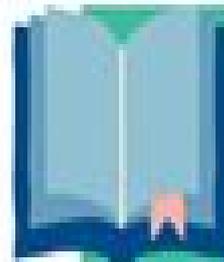

GET OUTSIDE

Research shows that being in nature can increase energy levels, reduce depression and boost well-being.

STAY ACTIVE

Exercise raises feel-good chemicals in the brain and improves sleep quality.

KEEP A JOURNAL

Taking time to reflect allows us to acknowledge and work through our emotions.

TURN OFF ELECTRONICS

Set aside time to unplug from your devices. Overuse can lead to anxiety, depression, and social isolation.

CONNECT WITH OTHERS

Spending time with friends and family has been shown to decrease stress.

Science Experiments Mental Health Tips 2025

, Lily O'Hara**

Science Experiments Mental Health Tips 2025:

High-Quality Psychosocial Interventions Research Patricia A. Areán, Michael D. Pullmann, 2026 This chapter provides an overview of the different types of clinical trial methods used to study the impact of psychosocial interventions on mental health and behavioral issues and when to use a particular trial design It sets the stage for the ensuing chapters that will describe how to conduct high quality psychosocial intervention research The Appendix provides a list of resources and sample tools from our own studies Provided by publisher *Education of Young Children Caught in Disasters* Judit Szente, 2026-02-19 This book addresses different types of disasters both human crises and environmental disasters and their implications on the education and social emotional development of young children birth through age 8 This volume is a new edition to *Assisting Young Children caught in Disaster Multidisciplinary Perspectives and Interventions* that highlighted 14 different disasters This edition revisits some of the main topics in the previous edition from 2018 and also focuses on some recent crises such as community and school violence infectious diseases recent gang activities in Haiti and child trafficking during and after the COVID 19 pandemic Furthermore it provides strategies regarding trauma informed practice and coping with the aftermath of violence terrorism and living in war torn contexts As both the research literature and current events indicate almost every day children around the world experience some type of a crisis According to UNICEF s 2023 report there have been an unprecedented number of humanitarian emergencies natural and human made unfolding around the world These include violence armed conflicts floods earthquakes and hurricanes Children who experience these conflicts most likely also experience poverty and become more vulnerable to malnutrition and diseases As the previous edition indicates such crises and trauma have various consequences on the lives of children such as Post Traumatic Stress Disorder PTSD and depression Although governments and agencies have done a large amount of work to address the needs of children affected by disasters early childhood teachers often still feel helpless and not prepared to address these needs in their classrooms This new edition provides both pre and in service early childhood teachers with such support *Alternative Attitudes Toward Suicide and Its Survivors* Gordon Brubacher, Nicolae Roddy, Christopher J. Krall, 2026-02-19 To better understand and address the needs of suicide loss survivors and those at risk of suicide this volume offers a multifaceted multidisciplinary approach based on the natural and social sciences but with the personal and spiritual needs of this vulnerable population in mind *Virtual and Augmented Reality* Achintya K. Bhowmik, 2026-01-13 A COMPREHENSIVE AND AUTHORITATIVE GUIDE TO THE FOUNDATIONS TECHNOLOGIES AND TRANSFORMATIVE APPLICATIONS OF VIRTUAL AND AUGMENTED REALITY *Virtual and Augmented Reality Fundamentals and Applications* presents an in depth exploration of the core principles enabling technologies and real world use cases of VR and AR Designed for use as both a textbook and a professional reference it offers a rigorous and structured foundation for students researchers engineers and industry practitioners alike Grounded in neuroscience and computational perception the text takes readers from first

principles to advanced topics in immersive system architecture and experience design It emphasizes human centered systems and multisensory engagement covering vision hearing balance touch and smell along with natural interaction modalities such as gesture voice gaze facial expressions and direct brain interfaces Key features include Foundations of human sensory perception and their technological counterparts in immersive systems Advances in 3D graphics high fidelity display technologies spatial audio computer vision and motion tracking Multimodal interaction and semantic understanding powered by artificial intelligence System design and usability considerations for end to end VR and AR platforms Case studies spanning entertainment healthcare education workforce training virtual tourism e commerce and more Authored by a leading innovator in immersive technologies this book is ideal for advanced instruction and serves as an essential reference for those shaping the future of virtual and augmented reality

Oxford Textbook of Suicidology and Suicide

Prevention Danuta Wasserman,2021 Part of the authoritative Oxford Textbooks in Psychiatry series the new edition of the Oxford Textbook of Suicidology and Suicide Prevention remains a key text in the field of suicidology fully updated with new chapters devoted to major psychiatric disorders and their relation to suicide

The Mental Health Impact of Weight

Stigma D. Catherine Walker,Erin N. Harrop ,Lily O'Hara,2026-01-21 The past thirty years have seen a rapid global increase in public discussion regarding people s body weight Weight stigma has increased concurrently with far ranging impacts on individuals and systems Weight stigma entails discrimination based on weight with larger bodied people bearing the brunt of this discrimination In health services weight stigma can lead to delayed care misdiagnosis increased costs overmedicalization treatment denial prolonged illness or injury and poor relationships between service users and providers all of which can lead to or exacerbate negative mental health impacts More weight inclusive approaches are emerging such as the American Medical Association s recent statement cautioning against using BMI as the sole indicator of health However steps towards weight inclusive public health and health service provision remain nominal The recent approval in some countries of GLP 1 agonists for weight loss has demonstrated that the health services sector continues to focus on weight loss often neglecting the mental health impacts of such an approach This Research Topic is focused on the mental health impact of weight stigma Mental health encompasses a range of states and conditions including mental wellbeing mental health problems mental illness and mental health disorders We invite high quality submissions that examine lived experiences predictors mediators and moderators of weight stigma and its mental health consequences We also welcome submissions exploring the development implementation and or evaluation of initiatives to reduce weight stigma and its mental health consequences at the intrapersonal interpersonal intersectional institutional or ideological levels For example such initiatives may include government or organizational policies health service provider professional education technologically based actions such as biofeedback and machine learning or any other initiative designed to reduce weight stigma and its impact on mental health Lastly we encourage submissions that explore weight inclusive approaches to mental health care We invite scholars from any

field of study to submit manuscripts focusing on any of these aspects related to weight stigma and its impact on mental health. Such disciplines may include but are not limited to anthropology, business studies, communications, cultural studies, disability studies, economics, education, environmental health, gender studies, law, media, medicine, nutrition, nursing, philosophy, physical therapy, political science, psychiatry, psychology, public health, sociology, social work, sports and exercise science, etc. We recommend authors familiarize themselves with the article by Meadows, Dan, et al. (2016). What's in a Word? On weight stigma and terminology. <https://doi.org/10.3389/fpsyg.2016.01527> for guidelines on weight-inclusive language. The authors conclude that all labels reflect culturally constructed values and what is important is that we use language that affirms the respect and human dignity of those about whom we speak and does not perpetuate the stigma. p. 3. The authors suggest that neutral terms such as weight and higher weight are likely to be suitable in the majority of situations. p. 3. Pathologizing labels such as overweight and obese are discouraged. We encourage authors submitting manuscripts to this Research Topic to adopt the principle of using language that affirms respect and human dignity of people in all sized bodies, including those with larger bodies. Within the dominant biomedical health paradigm, the term mental health often implicitly refers to mental health problems or mental illness. Regarding mental health, we request that authors be clear about which aspect is being discussed: mental wellbeing, mental health problems, mental illness, and/or mental health disorders. Topic Editor D. Catherine Walker is the sole proprietor of the private practice D. Catherine Walker, Ph.D. Psychology PLLC. The other Topic Editors declare no competing interests with regard to the Research Topic subject.
