Leonard Barolli, Hiroyoshi Miwa, 2022-08-16 With the fast development of the Internet we are experiencing a shift from the traditional sharing of information and applications as the main purpose of the Web to an emergent paradigm which locates people at the very center of networks and exploits the value of people s connections relations and collaboration Social networks are also playing a major role in the dynamics and structure of intelligent Web based networking and collaborative systems Virtual campuses virtual communities and organizations strongly leverage intelligent networking and collaborative systems by a great variety of formal and informal electronic relations such as business to business peer to peer and many types of online collaborative learning interactions including the emerging e learning systems This has resulted in entangled systems that need to be managed efficiently and in an autonomous way In addition latest and powerful technologies based on grid and wireless infrastructure as well as cloud computing are currently enhancing collaborative and networking applications a great deal but also facing new issues and challenges The principal purpose of the research and development community is to stimulate research that will lead to the creation of responsive environments for networking and at longer term the development of adaptive secure mobile and intuitive intelligent systems for collaborative work and learning The aim of the book *Advances on Intelligent Networking and Collaborative Systems* is to provide latest research findings innovative research results methods and development techniques from both theoretical and practical perspectives related to intelligent social networks and collaborative systems intelligent networking systems mobile collaborative systems secure intelligent cloud systems and so on as well as to reveal synergies among various paradigms in such a multi disciplinary field intelligent collaborative systems [Henry of Pytchley's Book of Fees](#) Henry (of Pytchley.), 1927 **The Politics of Time** Guy

Standing, 2023-10-26 Guy Standing s books have over the years pieced together a necessary political and intellectual agenda His *Politics of Time* is a splendid and timely addition to this body of important work Yanis Varoufakis Time has always been political Throughout history how we use our time has been defined and controlled by the powerful and today is no exception

But we can reclaim control and in this book the pioneering economist Guy Standing shows us how The ancient Greeks organised time into five categories work labour recreation leisure and contemplation Labour was onerous whereas leisure was scholastic and included participation in public life and lifelong education Since the industrial revolution our time has been shaped by capitalism our jobs are supposed to provide all meaning in life our time outside labour is considered simply time off and politicians prioritise jobs above all other aspects of a good life Today we are experiencing the age of chronic uncertainty Mental illness is on the rise some people are experiencing more time freedom while many others are having more and more of their time stolen from them particularly the vulnerable and those in the precariat But there is a way forward We can create a new politics of time one that liberates us and helps save the planet through strengthening real leisure and working together through commoning We can retake control of our time but we must do it together **2030** Mauro F. Guillén, 2020-08-25 AN INTERNATIONAL BESTSELLER Wall Street Journal Bestseller A Porchlight Book Bestseller Financial Times Best Books of 2020 Yahoo Finance Favorite Business Books of 2020 JP Morgan NextList 2021 selection Bold provocative illuminates why we're having fewer babies the middle class is stagnating unemployment is shifting and new powers are rising ADAM GRANT The world is changing drastically before our eyes will you be prepared for what comes next A groundbreaking analysis from one of the world's foremost experts on global trends including analysis on how COVID 19 will amplify and accelerate each of these changes Once upon a time the world was neatly divided into prosperous and backward economies Babies were plentiful workers outnumbered retirees and people aspiring towards the middle class yearned to own homes and cars Companies didn't need to see any further than Europe and the United States to do well Printed money was legal tender for all debts public and private We grew up learning how to play the game and we expected the rules to remain the same as we took our first job started a family saw our children grow up and went into retirement with our finances secure That world and those rules are over By 2030 a new reality will take hold and before you know it There will be more grandparents than grandchildren The middle class in Asia and Sub-Saharan Africa will outnumber the US and Europe combined The global economy will be driven by the non-Western consumer for the first time in modern history There will be more global wealth owned by women than men There will be more robots than workers There will be more computers than human brains There will be more currencies than countries All these trends currently underway will converge in the year 2030 and change everything you know about culture the economy and the world According to Mauro F Guillén the only way to truly understand the global transformations underway and their impacts is to think laterally That is using peripheral vision or approaching problems creatively and from unorthodox points of view Rather than focusing on a single trend climate change or the rise of illiberal regimes for example Guillén encourages us to consider the dynamic interplay between a range of forces that will converge on a single tipping point 2030 that will be for better or worse the point of no return 2030 is both a remarkable guide to the coming changes and an exercise in the power of lateral thinking thereby revolutionizing the way

Past and Future Presence Lissa Crofton-Sleigh, Brian Beams, 2024-05-14 While uses and studies of XR technology within STEM based education have been plentiful in recent years there has been lesser or even at times a lack of coverage for this novel learning tool in the arts and humanities Past and Future Presence aims to bridge some of that gap by presenting research based theory and case studies of successful application and implementation of XR technology into postsecondary educational settings ranging in topics from ancient to modern languages classical and contemporary art and reenvisioned historical scenes and events presented in ways never seen before The studies also contemplate how this novel medium can enhance and supplement learning in classrooms and other formal or informal learning environments The volume as a whole is intended to demonstrate to educators scholars and researchers in higher education the potential value of integrating XR technology into their classrooms and to provide a strong argument for college and university administrators to invest in training and development of new research and content for classrooms inside and outside of STEM The authors of these chapters come from a diverse range of backgrounds at different stages of their careers providing a broad crosssection of scholastic work within the humanities and arts Each chapter offers a different angle or approach to incorporating XR technology into teaching or research within different subject areas As the volume suggests this technology also places additional emphasis on the humanity within the humanities by focusing on increasing connection between users and different cultures time periods and perspectives
