Learning with Python has taught thousands of readers how to put the full capabilities of deep learning into action. This extensively revised second edition introduces deep learning using Python and Keras and is loaded with insights for both novice and experienced ML practitioners. You'll learn practical techniques that are easy to apply in the real world and important theory for perfecting neural networks. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications.

About the technology: Recent innovations in deep learning unlock exciting new software capabilities like automated language translation, image recognition, and more. Deep learning is becoming essential knowledge for every software developer, and modern tools like Keras and TensorFlow put it within your reach, even if you have no background in mathematics or data science.

About the book: *Deep Learning with Python, Second Edition* introduces the field of deep learning using Python and the powerful Keras library. In this new edition, Keras creator François Chollet offers insights for both novice and experienced machine learning practitioners. As you move through this book, you'll build your understanding through intuitive explanations, crisp illustrations, and clear examples. You'll pick up the skills to start developing deep learning applications.

What's inside: Deep learning from first principles, Image classification and image segmentation, Time series forecasting, Text classification and machine translation, Text generation, neural style transfer, and image generation.

About the reader: For readers with intermediate Python skills. No previous experience with Keras, TensorFlow, or machine learning is required.

About the author: François Chollet is a software engineer at Google and creator of the Keras deep learning library.

Table of Contents: 1. What is deep learning? 2. The mathematical building blocks of neural networks 3. Introduction to Keras and TensorFlow 4. Getting started with neural networks: Classification and regression 5. Fundamentals of machine learning 6. The universal workflow of machine learning 7. Working with Keras: A deep dive 8. Introduction to deep learning for computer vision 9. Advanced deep learning for computer vision 10. Deep learning for timeseries 11. Deep learning for text 12. Generative deep learning 13. c't Working with AI c't-Redaktion, 2024-01-24: The special issue of c't KI Praxis provides tests and practical instructions for working with chatbots. It explains why language models make mistakes and how they can be minimised. This not only helps when you send questions and orders to one of the chatbots offered online. If you do not want to or are not allowed to use the cloud services for data protection reasons, for example, you can also set up your own voice AI. The c't editorial team explains where to find a suitable voice model, how to host it locally, and which service providers can host it. The fact that generative AI is becoming increasingly productive harbours both opportunities and risks. Suitable rules for the use of AI in schools, training, and at work help to exploit opportunities and minimise risks.
