Hands-On Artificial Intelligence for IoT Dr. Amita Kapoor,2025-05-16 Master AI and IoT integration from fundamentals to advanced techniques and revolutionize your approach to building intelligent data driven solutions across industries Free with your book DRM free PDF version access to Packt s next gen Reader Key Features Leverage the power of Python libraries such as TensorFlow and Keras to work with real time IoT data Enhance your IoT solutions with advanced AI techniques including deep learning optimization and generative adversarial networks Gain practical insights through industry specific IoT case studies in manufacturing smart cities and automation Purchase of the print or Kindle book includes a free PDF eBook Book DescriptionTransform IoT devices into intelligent systems with this comprehensive guide by Amita Kapoor Chief AI Officer at Tipz AI Drawing on 25 years of expertise in developing intelligent systems across industries she demonstrates how to harness the combined power of artificial intelligence and IoT technology A pioneer in making AI and neuroscience education accessible worldwide Amita guides you through creating smart efficient systems that leverage the latest advances in both fields This new edition is updated with various optimization techniques in IoT used for enhancing efficiency and performance It introduces you to cloud platforms such as Platform as a Service PaaS and Infrastructure as a Service IaaS for analyzing data generated using IoT devices You ll learn about machine learning algorithms deep learning techniques and practical applications in real world IoT scenarios and advance to creating AI models that work with diverse data types including time series images and audio You ll also harness the power of widely used Python libraries TensorFlow and Keras to build a variety of smart AI models Email sign up and proof of purchase requiredWhat you will learn Integrate AI and IoT for enhanced device intelligence Understand how to build scalable and efficient IoT systems Master both supervised and unsupervised machine learning techniques for processing IoT data Explore the full potential of deep learning in IoT applications Discover AI driven strategies to optimize IoT system efficiency Implement real world IoT projects that leverage AI capabilities Improve device performance and decision making using AI algorithms Who this book is for This book is for IoT developers engineers and tech enthusiasts particularly those with a background in Python looking to integrate artificial intelligence and machine learning into IoT systems Python developers eager to apply their knowledge in new innovative ways will find it useful It s also an invaluable guide for anyone with a foundational understanding of IoT concepts ready to take their skills to the next level and shape the future of intelligent devices **Generative and Open AI in Industry 5.0** Sangeeta Sharma,Robin Singh Bhadoria,Mukesh Kumar Giluka,2026-04-23 This book provides an up to date and easy to read introduction to Generative AI and its revolutionary contribution to building Industry 5 0 Written for both practitioners and interested readers it is a clear and compelling overview of the technologies at the heart of the next industrial revolution The book introduces the conceptual notions behind generative models large language models LLMs and the neural networks that drive them It delves into the mathematical and conceptual foundations of Generative AI transformer architecture and the

practical applications of language and vision models Further the book links the innovations to Industry 5 0 discussing digital twins predictive maintenance DevOps and cybersecurity in intelligent systems It encompasses real world applications of AI in areas such as finance manufacturing and smart infrastructure Case studies like the application of generative models in FinTech and blockchain adoption underscore how AI is already transforming business and society around the world The book is perfect for students researchers and practitioners of AI data science and industrial systems interested in comprehending the theory and practical applications of Generative AI It also benefits educators and policymakers who wish to lead in cutting edge technological advancements with emphasis on responsible secure and human oriented AI applications for a brighter future   **Building LLM Powered Applications** Valentina Alto,2024-05-22 Get hands on with GPT 3 5 GPT 4 LangChain Llama 2 Falcon LLM and more to build LLM powered sophisticated AI applications Get With Your Book PDF Copy AI Assistant and Next Gen Reader Free Key Features Embed LLMs into real world applications Use LangChain to orchestrate LLMs and their components within applications Grasp basic and advanced techniques of prompt engineering Book DescriptionBuilding LLM Powered Applications delves into the fundamental concepts cutting edge technologies and practical applications that LLMs offer ultimately paving the way for the emergence of large foundation models LFMs that extend the boundaries of AI capabilities The book begins with an in depth introduction to LLMs We then explore various mainstream architectural frameworks including both proprietary models GPT 3 5 4 and open source models Falcon LLM and analyze their unique strengths and differences Moving ahead with a focus on the Python based lightweight framework called LangChain we guide you through the process of creating intelligent agents capable of retrieving information from unstructured data and engaging with structured data using LLMs and powerful toolkits Furthermore the book ventures into the realm of LFMs which transcend language modeling to encompass various AI tasks and modalities such as vision and audio Whether you are a seasoned AI expert or a newcomer to the field this book is your roadmap to unlock the full potential of LLMs and forge a new era of intelligent machines What you will learn Explore the core components of LLM architecture including encoder decoder blocks and embeddings Understand the unique features of LLMs like GPT 3 5 4 Llama 2 and Falcon LLM Use AI orchestrators like LangChain with Streamlit for the frontend Get familiar with LLM components such as memory prompts and tools Learn how to use non parametric knowledge and vector databases Understand the implications of LFMs for AI research and industry applications Customize your LLMs with fine tuning Learn about the ethical implications of LLM powered applications Who this book is for Software engineers and data scientists who want hands on guidance for applying LLMs to build applications The book will also appeal to technical leaders students and researchers interested in applied LLM topics We don t assume previous experience with LLM specifically But readers should have core ML software engineering fundamentals to understand and apply the content   **GPT-3** Sandra Kublik,Shubham Saboo,2022-07-11 GPT 3 NLP with LLMs is a unique pragmatic take on Generative Pre trained Transformer 3 the famous AI language model launched by

OpenAI in 2020 This model is capable of tackling a wide array of tasks like conversation text completion and even coding with stunningly good performance Since its launch the API has powered a staggering number of applications that have now grown into full fledged startups generating business value This book will be a deep dive into what GPT 3 is why it is important what it can do what has already been done with it how to get access to it and how one can build a GPT 3 powered product from scratch This book is for anyone who wants to understand the scope and nature of GPT 3 The book will evaluate the GPT 3 API from multiple perspectives and discuss the various components of the new burgeoning economy enabled by GPT 3 This book will look at the influence of GPT 3 on important AI trends like creator economy no code and Artificial General Intelligence and will equip the readers to structure their imaginative ideas and convert them from mere concepts to reality **Prompt Engineering for Generative AI** James Phoenix,Mike Taylor,2024-05-16 Large language models LLMs and diffusion models such as ChatGPT and Stable Diffusion have unprecedented potential Because they have been trained on all the public text and images on the internet they can make useful contributions to a wide variety of tasks And with the barrier to entry greatly reduced today practically any developer can harness LLMs and diffusion models to tackle problems previously unsuitable for automation With this book you ll gain a solid foundation in generative AI including how to apply these models in practice When first integrating LLMs and diffusion models into their workflows most developers struggle to coax reliable enough results from them to use in automated systems Authors James Phoenix and Mike Taylor show you how a set of principles called prompt engineering can enable you to work effectively with AI Learn how to empower AI to work for you This book explains The structure of the interaction chain of your program s AI model and the fine grained steps in between How AI model requests arise from transforming the application problem into a document completion problem in the model training domain The influence of LLM and diffusion model architecture and how to best interact with it How these principles apply in practice in the domains of natural language processing text and image generation and code *Build AI-Enhanced Web Apps* Theo Despoudis,2026-03-17 This book shows you step by step and example by example how to build sites and applications that take advantage of large language models LLMs like GPT Claude and Llama Written especially for web developers comfortable with React or Next js this book introduces the tools and techniques you need to add sophisticated AI features like Retrieval Augmented Generation RAG document summarization chatbots and more to your web based projects It guides you through AI development using only JavaScript and other common web dev skills no Python or Machine Learning experience required You ll learn by working with full scale AI projects that solve actual business problems You ll soon be delivering user friendly efficient interfaces that make the absolute best use of AI tech In Build AI Enhanced Web Apps you ll learn how to Integrate AI models into React and Next js applications Implement streaming responses and real time AI interactions Manage conversation history and context in chat applications Implement LangChain js for complex AI workflows and reasoning Build a web application for summarizing documents using LangChain js Utilize Retrieval

Augmented Generation RAG systems for knowledge management Develop an AI powered interview preparation system with voice feedback About the technology The users have spoken Agents personalized responses and other LLM powered features are required in modern web applications Build AI Enhanced Web Apps presents the end to end architecture of AI web apps including UI backend infrastructure data processing API integration deployment and scaling with examples and language perfect for professional web developers About the book This accessible book shows you how to ship real AI features not just toy demos using a JavaScript stack you already know React for UI Next js for backend integration and the Vercel AI SDK to connect to LLMs like Gemini and GPT In it you ll acquire the skills you need to complete two portfolio ready projects a voice based interview assistant and a RAG powered corporate knowledge system You ll also learn how to design workflows that balance latency cost and UX and implement responsible guardrails for security quality control hallucinations and bias What s inside Build AI features using a professional stack Ship production ready features Learn from concrete projects About the reader For web developers familiar with JavaScript and React About the author Theo Despoudis is a Senior Engineer at WP Engine specializing in AI powered search and headless WordPress He is an expert in integrating LLMs RAG and Vercel AI SDK into React and Next js apps Table of Contents Part 1 1 Using generative AI in web apps 2 Building your first generative AI web application 3 Connecting AI models with the Vercel AI SDK 4 Managing conversation and state in your application Part 2 5 Prompt engineering in web applications 6 Building AI workflows with LangChain js 7 Document summarization and RAG with LangChain js 8 Testing and debugging techniques 9 Deployment and security Part 3 10 Building an AI interview assistant Project walk through 11 Building an AI RAG agent Project walk through Part 4 12 Integrating web apps with the Model Context Protocol A Running the examples **Building Generative AI Services with FastAPI** Alireza Parandeh,2025-04-15 Ready to build production grade applications with generative AI This practical guide takes you through designing and deploying AI services using the FastAPI web framework Learn how to integrate models that process text images audio and video while seamlessly interacting with databases filesystems websites and APIs Whether you re a web developer data scientist or DevOps engineer this book equips you with the tools to build scalable real time AI applications Author Alireza Parandeh provides clear explanations and hands on examples covering authentication concurrency caching and retrieval augmented generation RAG with vector databases You ll also explore best practices for testing AI outputs optimizing performance and securing microservices With containerized deployment using Docker you ll be ready to launch AI powered applications confidently in the cloud Build generative AI services that interact with databases filesystems websites and APIs Manage concurrency in AI workloads and handle long running tasks Stream AI generated outputs in real time via WebSocket and server sent events Secure services with authentication content filtering throttling and rate limiting Optimize AI performance with caching batch processing and fine tuning techniques Visit the Book s Website   Impact and implications of AI methods and tools for the future of education Kingsley Okoye,Samira Hosseini,Kamal Kant Hiran ,Julius
