or unacceptable. It is a form of social norms that guides human behaviors. Morality forms a fundamental part of our culture but there is a great range of variation in moral standards and the things we value in each given culture. Behavior that is completely normal to Westerners such as choosing a job or partner at one's individual will could be considered immoral in other cultures. People are rewarded with money and reputations if they exhibit moral actions approved by cultural expectations and are punished by sanctions for moral violations. We also attribute positive feedback to people we consider moral e.g. empathetic filial and negative feedback to those we consider immoral untrustworthy disgusting. Thus it is important to study the psychological antecedents processes and outcomes of morality.
