Comme Un Roman Daniel Pennac:

Algorithmic Geometry Jean-Daniel Boissonnat, Mariette Yvinec, 1998-03-05 The design and analysis of geometric algorithms have seen remarkable growth in recent years due to their application in for example computer vision graphics medical imaging and CAD The goals of this book are twofold first to provide a coherent and systematic treatment of the foundations secondly to present algorithmic solutions that are amenable to rigorous analysis and are efficient in practical situations When possible the algorithms are presented in their most general d dimensional setting Specific developments are given for the 2 or 3 dimensional cases when this results in significant improvements The presentation is confined to Euclidean affine geometry though the authors indicate whenever the treatment can be extended to curves and surfaces The prerequisites for using the book are few which will make it ideal for teaching advanced undergraduate or beginning graduate courses in computational geometry

Literary Culture in a World Transformed William Paulson, 2018-08-06 Literary studies are in danger of being left behind in the twenty first century Print culture risks becoming a thing of the past in the multimedia age meanwhile human life and society are undergoing rapid changes as a result of new technologies the intensification of global capitalism and the effects of human actions on the environment In this transformed world William Paulson argues for a radical renewal of literary studies Modern literary culture has defined itself in opposition to science politics and commerce as a protected sphere of democratic and free inquiry but today that autonomy may lead to isolation from the real dynamics of cultural and global change Paulson clearly and convincingly demonstrates the need for literary studies to embrace both the unfashionable literary past and the technologically saturated future and to train not a countersociety of cultural critics but citizens of the world who can communicate the irreducible strangeness and multiplicity of literature to a society on hyperdrive His series of concrete proposals ranging from a closer connection between literature and everyday language to the restructuring of undergraduate and graduate education will immeasurably enrich current discussions of the humanities role in the life of the world
