Building LLMs for Production Louis-François Bouchard, Louie Peters, 2024-05-21 This is the most comprehensive textbook to date on building LLM applications all essential topics in an AI Engineer's toolkit Jerry Liu Co founder and CEO of LlamaIndex THE BOOK WAS UPDATED ON OCTOBER 2024 With amazing feedback from industry leaders this book is an end to end resource for anyone looking to enhance their skills or dive into the world of AI and develop their understanding of Generative AI and Large Language Models LLMs It explores various methods to adapt foundational LLMs to specific use cases with enhanced accuracy reliability and scalability Written by over 10 people on our Team at Towards AI and curated by experts from Activeloop LlamaIndex Mila and more it is a roadmap to the tech stack of the future The book aims to guide developers through creating LLM products ready for production leveraging the potential of AI across various industries It is tailored for readers with an intermediate knowledge of Python What's Inside this 470 page Book Updated October 2024 Hands on Guide on LLMs Prompting Retrieval Augmented Generation RAG Fine tuning Roadmap for Building Production Ready Applications using LLMs Fundamentals of LLM Theory Simple to Advanced LLM Techniques Frameworks Code Projects with Real World Applications Colab Notebooks that you can run right away Community access and our own AI Tutor Table of Contents Chapter I Introduction to Large Language Models Chapter II LLM Architectures Landscape Chapter III LLMs in Practice Chapter IV Introduction to Prompting Chapter V Retrieval Augmented Generation Chapter VI Introduction to LangChain LlamaIndex Chapter VII Prompting with LangChain Chapter VIII Indexes Retrievers and Data Preparation Chapter IX Advanced RAG Chapter X Agents Chapter XI Fine Tuning Chapter XII Deployment and Optimization Whether you're looking to enhance your skills or dive into the world of AI for the first time as a programmer or software student our book is for you From the basics of LLMs to mastering fine tuning and RAG for scalable reliable AI applications we guide you every step of the way

Social Data Analytics in the Cloud with AI Xuebin Wei, Xinyue Ye, 2024-12-30 The rise of cloud computing and Generative artificial intelligence AI has revolutionized data analytics pipelines Analysts can collect store and process vast datasets in the cloud with high availability and scalability and also leverage Generative AI to query and visualize datasets in natural languages This pioneering textbook provides a gateway for students educators and professionals to develop and enhance social data analytics capabilities with the latest cloud computing and AI technologies The textbook introduces educational cloud resources from leading technology companies begins with foundational concepts and progresses to advanced techniques Features The first textbook on cloud based social data analytics with the assistance of Generative AI Introduces educational cloud resources from leading technology companies like AWS GitHub and MongoDB Presents a fully AI powered data analytics pipeline from Python coding to data collection with APIs cloud based data storage natural language queries and interactive visualization Analyzes Census and social media data with the latest large language models LLMs Provides hands on exercises with real world datasets on timely issues This textbook is an excellent resource for upper

level undergraduate and graduate students taking GIS Urban Informatics Social Science Data Analysis and Data Science courses faculty members teaching such courses and professionals and researchers interested in leveraging cloud computing and Generative AI in social data analytics

ChatGPT eBook GURMEET SINGH DANG, **LangGraph for Beginners** Kieran Fluxwell, 2025-11-20 What if you could build powerful AI agents even as a complete beginner and finally understand LangGraph the OpenAI API and Python automation without getting lost or overwhelmed If you've been struggling with tutorials that jump too fast confusing jargon or incomplete explanations you're not alone Maybe you've tried learning AI with Python before but every guide felt too advanced Or you wanted to create practical projects like an AI coding assistant a PDF Q A bot or real AI automation workflows but had no idea where to start This book changes everything LangGraph for Beginners gives you a clear path to building your own AI assistants using LangGraph OpenAI Python workflows and beginner friendly AI agent automation techniques You'll learn step by step how to create real projects structure agent workflows and use best practices normally reserved for advanced developers Whether you're exploring AI agents with Python experimenting with LangChain beginner workflows or building your first OpenAI Python tutorial project this book shows you exactly what to do without unnecessary complexity By the end you'll confidently plan build and deploy AI agents even if you've never created anything beyond simple scripts Inside this book you'll discover how to Build smart structured agents using LangGraph for beginners with diagrams and real examples Create end to end AI agent Python projects from idea workflow output Follow project based walkthroughs using python openai tutorial patterns Master essential skills for AI automation with Python even with no prior experience Understand the differences between tool calling and function calling in real agent systems Build reusable workflows and templates that match modern AI workflow builder practices Apply the same step by step methods used to create AI coding assistant projects and other real world automations Perfect for beginners who want to build real AI tools fast Whether you're a student an engineer a freelancer or simply someone curious about openai python projects this book gives you everything you need to succeed complete with explanations templates project scaffolds and a learning path that grows with you Ready to stop watching tutorials and start building your own AI agents If your goal is to truly understand how AI agents work and actually build them then LangGraph for Beginners is the guide you've been waiting for Start your journey into Python based AI automation today Your future AI projects are waiting inside

Deep Learning with Theano Christopher Bourez, 2017-07-31 Develop deep neural networks in Theano with practical code examples for image classification machine translation reinforcement agents or generative models About This Book Learn Theano basics and evaluate your mathematical expressions faster and in an efficient manner Learn the design patterns of deep neural architectures to build efficient and powerful networks on your datasets Apply your knowledge to concrete fields such as image classification object detection chatbots machine translation reinforcement agents or generative models Who This Book Is For This book is intended to provide a full overview of deep learning From the beginner in deep learning and artificial

intelligence to the data scientist who wants to become familiar with Theano and its supporting libraries or have an extended understanding of deep neural nets Some basic skills in Python programming and computer science will help as well as skills in elementary algebra and calculus

What You Will Learn Get familiar with Theano and deep learning Provide examples in supervised unsupervised generative or reinforcement learning Discover the main principles for designing efficient deep learning nets convolutions residual connections and recurrent connections Use Theano on real world computer vision datasets such as for digit classification and image classification Extend the use of Theano to natural language processing tasks for chatbots or machine translation Cover artificial intelligence driven strategies to enable a robot to solve games or learn from an environment Generate synthetic data that looks real with generative modeling Become familiar with Lasagne and Keras two frameworks built on top of Theano

In DetailThis book offers a complete overview of Deep Learning with Theano a Python based library that makes optimizing numerical expressions and deep learning models easy on CPU or GPU The book provides some practical code examples that help the beginner understand how easy it is to build complex neural networks while more experimented data scientists will appreciate the reach of the book addressing supervised and unsupervised learning generative models reinforcement learning in the fields of image recognition natural language processing or game strategy The book also discusses image recognition tasks that range from simple digit recognition image classification object localization image segmentation to image captioning Natural language processing examples include text generation chatbots machine translation and question answering The last example deals with generating random data that looks real and solving games such as in the Open AI gym At the end this book sums up the best performing nets for each task While early research results were based on deep stacks of neural layers in particular convolutional layers the book presents the principles that improved the efficiency of these architectures in order to help the reader build new custom nets

Style and approachIt is an easy to follow example book that teaches you how to perform fast efficient computations in Python Starting with the very basics NumPy installing Theano this book will take you to the smooth journey of implementing Theano for advanced computations for machine learning and deep learning

OpenAI Sora for Beginners Taylor Brooks, 2026-02-15

OpenAI Sora for Beginners Create and Monetise AI Videos from Text Prompts is a practical step by step guide for anyone who wants to use OpenAI Sora to turn written ideas into structured AI generated videos This book is designed for beginners content creators affiliate marketers YouTubers and digital product builders who want cinematic style visuals without cameras actors or traditional editing software Many people are curious about text to video AI but quickly get stuck once they open the interface They see multiple creative options style variations scene controls and prompt fields without a clear starting sequence Tutorials online often focus on features instead of process skip essential steps or assume prior experience in filmmaking The result is confusion inconsistent outputs and wasted time experimenting without structure This guide removes that friction by teaching a clear repeatable workflow for AI video creation You learn exactly how to move from concept to

finished clip including how to prepare a simple idea structure a strong text prompt define scene details refine tone and visual style and iterate logically without starting over Each stage builds in sequence so you always know what to do next Inside you will follow practical builds that can be reused or adapted including Creating a short cinematic intro for a YouTube channel Generating AI B roll from a written script Turning product notes into a simple promotional clip Converting a blog post into a short visual sequence Building short faceless content using text prompts The book introduces simple frameworks to reduce decision fatigue such as a Scene Blueprint method a Prompt Expansion pattern and a Refine and Review loop These repeatable structures make AI filmmaking more manageable and consistent Naturally integrated throughout the guide are beginner friendly search topics such as AI text to video tutorial Sora AI video creation guide create AI videos from text cinematic AI video prompts AI video monetisation guide text to video workflow for beginners AI video for YouTube creators generate video from script no camera video production AI filmmaking for beginners OpenAI Sora tutorial step by step digital content video automation AI B roll generation method create promotional videos with AI and simple AI video production system You will also learn how to Improve prompt clarity for stronger visuals Structure scenes for cinematic flow Control style tone and pacing Export usable clips for digital platforms Apply AI generated video in real content workflows Rather than abstract discussions about artificial intelligence this book focuses on practical execution Each example demonstrates a small recognizable build that shows how to move from written text to finished video output using a structured method No prior video production experience is required No complex editing software knowledge is assumed The emphasis remains on usability sequence and clarity so you can confidently create AI videos from text prompts and apply them in practical digital environments

LLM BUILDER FREDDIE MITCHELL, Are you ready to build powerful AI systems without writing a single line of code LLM BUILDER is the complete practical roadmap for entrepreneurs creators business owners consultants and beginners who want to design launch and scale intelligent systems using modern AI Whether you are searching for a no code AI chatbot builder strategy or a step by step custom GPT creation guide this book delivers a structured beginner friendly path to mastering today's most powerful AI capabilities This hands on guide shows you how to use AI automation tools beginners can implement immediately even without programming experience You will learn prompt engineering no coding techniques that allow you to control and optimize AI outputs with precision and clarity Instead of complex technical jargon you get real world frameworks that work Inside you will discover how to build custom GPTs for business marketing education productivity and client services You will follow a complete OpenAI GPT chatbot tutorial that walks you through real deployment scenarios from idea to execution The book explains RAG retrieval augmented generation in simple language so you can connect AI to your own documents databases and knowledge sources to create intelligent systems that produce accurate contextual responses You will also learn how to deploy AI agents without code using leading platforms and integrations Through practical walkthroughs you will master AI workflow automation to streamline operations automate

repetitive tasks capture leads improve customer support and increase efficiency across your business The book includes a detailed Voiceflow chatbot guide to help you design conversational AI experiences and a Make.com automation tutorial that demonstrates how to connect AI with real business processes You will explore the best no code AI tools available today and learn how to create AI agents beginners can confidently launch and scale This is not theory It is a builder's manual designed to help you take action immediately By the end of this book you will have the clarity confidence and systems required to build production ready no code AI assistants powered by OpenAI technologies If you want to stay competitive in a world increasingly driven by artificial intelligence this book gives you the skills to lead rather than follow The future belongs to AI builders Now it is your turn

Hands-On Intelligent Agents with OpenAI Gym Praveen Palanisamy,2018-07-31

Implement intelligent agents using PyTorch to solve classic AI problems play console games like Atari and perform tasks such as autonomous driving using the CARLA driving simulator Key Features Explore the OpenAI Gym toolkit and interface to use over 700 learning tasks Implement agents to solve simple to complex AI problems Study learning environments and discover how to create your own Book Description Many real world problems can be broken down into tasks that require a series of decisions to be made or actions to be taken The ability to solve such tasks without a machine being programmed requires a machine to be artificially intelligent and capable of learning to adapt This book is an easy to follow guide to implementing learning algorithms for machine software agents in order to solve discrete or continuous sequential decision making and control tasks Hands On Intelligent Agents with OpenAI Gym takes you through the process of building intelligent agent algorithms using deep reinforcement learning starting from the implementation of the building blocks for configuring training logging visualizing testing and monitoring the agent You will walk through the process of building intelligent agents from scratch to perform a variety of tasks In the closing chapters the book provides an overview of the latest learning environments and learning algorithms along with pointers to more resources that will help you take your deep reinforcement learning skills to the next level What you will learn Explore intelligent agents and learning environments Understand the basics of RL and deep RL Get started with OpenAI Gym and PyTorch for deep reinforcement learning Discover deep Q learning agents to solve discrete optimal control tasks Create custom learning environments for real world problems Apply a deep actor critic agent to drive a car autonomously in CARLA Use the latest learning environments and algorithms to upgrade your intelligent agent development skills Who this book is for If you're a student game machine learning developer or AI enthusiast looking to get started with building intelligent agents and algorithms to solve a variety of problems with the OpenAI Gym interface this book is for you You will also find this book useful if you want to learn how to build deep reinforcement learning based agents to solve problems in your domain of interest Though the book covers all the basic concepts that you need to know some working knowledge of Python programming language will help you get the most out of it
