Constructions A Construction Grammar Approach To Argument Structure:

Constructions Adele E. Goldberg, 1995-03-15 Drawing on work in linguistics language acquisition and computer science Adele E Goldberg proposes that grammatical constructions play a central role in the relation between the form and meaning of simple sentences She demonstrates that the syntactic patterns associated with simple sentences are imbued with meaning that the constructions themselves carry meaning independently of the words in a sentence Goldberg provides a comprehensive account of the relation between verbs and constructions offering ways to relate verb and constructional meaning and to capture relations among constructions and generalizations over constructions Prototypes frame semantics and metaphor are shown to play crucial roles In addition Goldberg presents specific analyses of several constructions including the ditransitive and the resultative constructions revealing systematic semantic generalizations Through a comparison with other current approaches to argument structure phenomena this book narrows the gap between generative and cognitive theories of language

Argument Structure in Usage-Based Construction Grammar Florent Perek, 2015-04-15 The argument structure of verbs defined as the part of grammar that deals with how participants in verbal events are expressed in clauses is a classical topic in linguistics that has received considerable attention in the literature This book investigates argument structure in English from a usage based perspective taking the view that the cognitive representation of grammar is shaped by language use and that crucial aspects of grammatical organization are tied to the frequency with which words and syntactic constructions are used On the basis of several case studies combining quantitative corpus studies and psycholinguistic experiments it is shown how a usage based approach sheds new light on a number of issues in argument realization and offers frequency based explanations for its organizing principles at three levels of generality verbs constructions and argument structure alternations

Construction Learning as a Complex Adaptive System Annalisa Baicchi, 2015-04-25 This book presents the current state of the art on Construction Grammar models and usage based language learning research It reports on three psycholinguistic experiments conducted with the participation of university level Italian learners of English whose second language proficiency corresponds to levels B1 and B2 of the Common European Framework of Reference for Languages CEFR This empirical research on the role of constructions in the facilitation of language learning contributes to assessing how bilinguals deal with L2 constructions in the light of sentence sorting sentence elicitation and sentence completion tasks Divided into two parts the book first introduces the main theoretical prerequisites and then reports on the experimental studies It provides a comprehensive review of the current research in a range of disciplines including complexity theories cognitive semantics construction grammars usage based linguistics and language learning **Construction Grammar in Second**

Language Teaching Sebastian Flock, 2016-12-12 Studienarbeit aus dem Jahr 2016 im Fachbereich Anglistik Linguistik Note 1,3 Friedrich Schiller Universität Jena Institut für Anglistik Amerikanistik Veranstaltung Cognitive Linguistics Construction Grammar Sprache Deutsch Abstract For more than 20 years now the concept of constructions has been playing a more and more important role in theories of language acquisition and language use In the 1980s Fillmore Kay and O'Conner were the first linguists interested in constructionist approaches and with her two books *Constructions A Construction Grammar Approach to Argument Structure and Construction at Work The Nature of Generalization in Language* Goldberg eventually paved the way for this alternative view on grammar By now Construction Grammar has become a well-accepted descriptive and processing model that is based on a substantial body of scientific publications However the big interest of Construction Grammar research in first language acquisition and native speakers language use contrasts the little interest in the branch of second language acquisition It is only recently that linguists have approached the question whether second language learners linguistic competence relies on constructions as well Hence it is no surprise that there has been only little interest in application of Construction Grammar in second language teaching as well In my opinion this is a wasted opportunity If Construction Grammar is widely accepted in the field of first language acquisition it is also necessary to transfer this concept to second language acquisition and teaching in order to create suitable teaching materials and methods Thus this paper is supposed to advocate an applied Construction Grammar in second language teaching **The Instruction and Acquisition of the BA Construction by Students of Chinese as a Foreign Language** Hongying Xu, 2023-11-03 The Instruction and Acquisition of the BA Construction by Students of Chinese as a Foreign Language tackles the linguistically unique and

notoriously difficult BA construction in Chinese covering its linguistic properties and acquisition by learners of Chinese as a foreign language alongside teaching recommendations Adopting the Interface Hypothesis and the Processing Instruction approach Hongying Xu argues that not all linguistic properties of the BA construction are equally difficult to acquire and that properties that call for knowledge from interfaces including semantics pragmatics and syntax are more difficult to master than those that involve pure syntactic knowledge Xu argues that instructors should provide manipulated input to help learners notice and process these properties before they are required to produce any grammatical and appropriate sentences using the ba construction

Defining Construction: Insights into the Emergence and Generation of Linguistic Representations Mike Putnam, Matthew Carlson, Antonio Fábregas, Eva Wittenberg, 2022-01-04 *Parts of speech in Construction Grammar* Johannes Huhmann, 2008-03-03 Seminar paper from the year 2007 in the subject English Language and Literature Studies Linguistics grade 1.0 University of Hamburg Institut für Anglistik und Amerikanistik course Parts of Speech language English abstract This term paper is concerning Construction Grammar and the way it attempts to handle parts of speech categories like nouns verbs and adjectives The seminar this paper was written for proved in a manifold of ways that when we restrict ourselves to the categories provided by traditional grammar we may face serious difficulties which call into question the fundamental categorizations of such grammar These problems or potential problems are the subject matter of the first part of this paper In the second part I will give an overview of Construction Grammar Since the concept of construction is central to Construction Grammar I will first clarify the notion of construction outside of the Construction Grammar framework in 2.1 before moving to an account in 2.2 of those features that can be seen as the smallest common denominator for defining constructions within different Construction Grammars One of my principal findings is the differing manners in which Construction Grammars in general and a specific variant of Construction Grammar namely Croft's Radical Construction Grammar address the issue of parts of speech Part three will present Croft's grammar as an answer to one of the central questions raised in this seminar namely which model is most adequate for categorising word classes in a single language like English but also in a cross linguistic sense This examination will be followed by some concluding remarks in part four

Applied Construction Grammar Sabine De Knop, Gaëtanelle Gilquin, 2016-04-25 Current research within the framework of Construction Grammar CxG has mainly adopted a theoretical or descriptive approach neglecting the more applied perspective and especially the question of how language acquisition and pedagogy can benefit from a CxG based approach The present volume explores various aspects of Applied Construction Grammar through a collection of studies that apply CxG and CxG inspired approaches to relevant issues in L2 acquisition and teaching Relying on empirical data and covering a wide range of constructions and languages the chapters show how the cross fertilization of CxG and L2 acquisition teaching can improve the description of learners use of constructions provide theoretical insights into the processes underlying their acquisition e.g. with reference to inheritance links or transfer from the L1 or lead to novel

teaching practices and resources aimed to help learners make the generalizations that native speakers make naturally from the input they receive The Oxford Handbook of Construction Grammar Thomas Hoffmann, Graeme Trousdale, 2013-02-22

The last decade has seen a rise in popularity in construction based approaches to grammar The various approaches within the rubric construction grammar all see language as a network of constructions pairings of form and meaning Construction Grammar as a kind of cognitive linguistics differs significantly from mainstream generative grammar as espoused by Chomsky and his followers Advocates of Construction Grammar see it as a psychologically plausible theory of human language As such it is capable of providing a principled account of language acquisition language variation and language change Research in Construction Grammar also includes multidisciplinary cognitive studies in psycholinguistics

neurolinguistics and computational linguistics The Oxford Handbook of Construction Grammar is the first authoritative reference work solely dedicated to Construction Grammar Divided into five sections the book will be an invaluable resource that students and scholars alike can turn to for a comprehensive account of current work on Construction Grammar its theoretical foundations and its applications to and relationship with other kinds of linguistic enquiry **Foreign Language**
