The Fate of Gender Frank Browning, 2016-06-07 Frank Browning takes us into human gender geographies around the world from gender neutral kindergartens in Chicago and Oslo to women s masturbation classes in Shanghai from conservative Catholics in Paris fearful of God and Nature to transsexual Mormon parents in Utah As he shares specific and engaging human stories he also elucidates the neuroscience that distinguishes male and female biology shows us how all parents brains change during the first weeks of parenthood and finally how men s and women s responses to age differ worldwide based not on biology but on their earlier life habits Starting with Simone de Beauvoir s world famous observation that one is not born a woman but instead becomes a woman Browning goes on to show equally that no one is born a man but learns how to perform as a man and that there is no fixed way of being masculine or feminine Increasingly the categories of male and female and even gay and straight seem old fashioned and reductive Just visible on the horizon is a world of gender and sexual fluidity that will remake our world in fundamental ways Linking science to culture and behavior and delving into the lives of individuals challenging historic notions Browning questions the traditional division of Nature vs Nurture in

everything from plant science to sexual expression arguing in the end that life consists of an endless waltz between these two ancient notions

Invoking the Beyond: Paul D. Collins, Phillip D. Collins, 2020-11-22 The Gnostic revival of the Enlightenment witnessed the erection of what could be called the Kantian Rift an epistemological barrier between external reality and the mind of the percipient Arbitrarily proclaimed by German philosopher Immanuel Kant this barrier rendered the world as a terra incognita Suddenly the world out there was deemed imperceptible and unknowable In addition to the outer world the cherished metaphysical certainties of antiquity the soul a transcendent order and God swiftly evaporated The way was paved for a new set of modern mythmakers who would populate the world out there with their own surrogates for the Divine Collectively these surrogates could be referred to as the Beyond because they epistemologically and ontologically overwhelm humanity In recent years the Beyond has been invoked by theoreticians literary figures intelligence circles and deep state operatives who share some variant of a technocratic vision for the world In turn these mythmakers have either directly or indirectly served elitist interests that have been working toward the establishment of a global government and the creation of a New Man Their hegemony has been legitimized through the invocation of a wrathful earth goddess a technological Singularity a superweapon and extraterrestrial gods All of these are merely masks for the same counterfeit divinity the Beyond

Encyclopedia of Gender and Society Jodi O'Brien, 2009 Provides timely comparative analysis from internationally known contributors

Seeing Nature Through Gender Virginia Scharff, 2003 Environmental history has traditionally told the story of Man and Nature Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender Seeing Nature

through Gender here reintroduces gender as a meaningful category of analysis for environmental history showing how women's actions, desires, and choices have shaped the world and seeing men as gendered actors as well. In thirteen essays that show how gendered ideas have shaped the ways in which people have represented, experienced, and consumed their world, Virginia Scharff and her coauthors explore interactions between gender and environment in history. Ranging from colonial borderlands to transnational boundaries, from mountaintop to marketplace, they focus on historical representations of humans and nature on questions about consumption, environmental politics, and on the complex reciprocal relations among human bodies and changing landscapes. They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies. Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly, often with dire consequences for other people and organisms. Here are considerations of the ways we study sexuality among birds of William Byrd's masking sexual encounters in his account of an eighteenth-century expedition, of how the ecology of fire in a changing built environment has reshaped firefighters' own gendered identities. Some are playful, as in a piece on the evolution of snow bunnies to shred beetles. Others are dead serious, as in a chilling portrait of how endocrine disruptors are reinventing humans, animals, and water systems from the cellular level out. Aiding and adding significantly to the enterprise of environmental history, *Seeing Nature through Gender* bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we've engraved on ourselves and on the planet.

Gender Relations in Global Perspective Nancy Cook, 2007

Faced with an increasingly diverse student population, an expanding field of gender scholarship, and an academic emphasis on multidisciplinary social science, professors often struggle to address and integrate such a broad array of gender issues in their courses. This book addresses that challenge by increasing students' understandings of gender relations in multiple social fields across time and space. *Gender Relations in Global Perspective* is truly multidisciplinary. It is partially drawn from the work of sociologists, but articles written by gender scholars from the disciplines of cultural studies, history, political science, geography, and literary theory are also included. The readings examine historically persistent, cross-culturally relevant, and empirically grounded concerns such as men's position in the family and women's relationship to work, media, and the global economy, as well as the gendered problems of violence, sexuality, and reproduction, and racism. This book presents an engaging range of comparative and cross-cultural gender analyses from various world regions, including the Middle East, South Asia, South East Asia, Europe, the Americas, and Africa. As the articles are dialogically situated in this text, readers will be able to analyse gender similarities and differences around the globe and learn about the diversity of gender experiences across cultures and regions. This range of analyses demonstrates how a global perspective enriches feminist analyses. Students will quickly learn that to investigate gender dynamics adequately, attention must be paid simultaneously to the processes of racialization, class, colonialism, and imperialism, and sexuality that interweave
