Direct Licensing and the Music Industry Ivan L Pitt,2015-10-13 This book discusses the economics of the music industry in the context of the changing landscape brought about by innovation technological change and rapid digitization The ability of digital technology to reduce the transaction costs of music copyright licensing has all but destroyed the traditional media business models of incumbent Performance Rights Organizations PROs music publishers record labels and radio and television stations In a climate where streaming services are rapidly proliferating and consumers prefer subscription models over direct ownership new business models such as direct licensing are developing This book provides an overview of the economics of the traditional music industry the technology induced changes in business models and

copyright law and the role of publishers copyright holders and songwriters in the emerging direct licensing model In Part One the author examines the economic aspects of direct licensing as an alternative to the traditional blanket license for copyrighted musical compositions with an emphasis on the often monopolistic nature of PROs In Part Two the author focuses on the music publisher and the role direct licensing and competition may play in the changing business models in the music industry and the potential benefits this may bring to copyright holders such as songwriters To compliment this model the author proposes a maximum statutory fixed rate for musical performances to further streamline the royalty process especially where distributors such as Google and YouTube are concerned This book adds to the growing body of literature on the economics of music licensing in the digital age It will be useful to those in the fields of economics and law as well as music executives musicians songwriters composers and other industry professionals who are interested in understanding how technology innovation and competition have reshaped the music industry

Fund Math Gideon Fairchild,AI,2025-02-27 Fund Math offers a practical guide to mastering financial mathematics essential for sound economic decision making The book emphasizes that understanding financial ratios capital

allocation and business investment calculations is crucial for value creation. It uniquely bridges the gap between theoretical concepts and real world applications, empowering readers to make informed decisions. Did you know that concepts like Net Present Value (NPV) and Internal Rate of Return (IRR) are key tools for evaluating investment opportunities? The book highlights how dividend policies and share repurchase programs impact shareholder value. The book progresses from basic financial ratios to advanced topics like discounted cash flow (DCF) analysis. It uses real world case studies, contemporary data, and spreadsheet modeling to demonstrate calculations. For instance, understanding a company's cash flow is as vital as understanding its profit, akin to knowing how much water is actually in a bucket versus how much it should hold. Fund Math also connects to accounting, corporate strategy, and risk management, providing a holistic view of financial decision making.

Start with What Works by Andy Bass, 2021-05-01. Start with What Works helps you to create new growth opportunities using the resources you already have at hand. It sounds obvious, but frequently managers discount the value of their familiar resources and instead they look outside for something new. This can demotivate employees and be costly in terms of money and time. It's often a lot quicker, cheaper, and safer to see your existing resources with fresh eyes. This book shows you how to recognise overlooked potential in existing resources and how to flip the right switches to activate that potential. Covering ten lessons you can use for a variety of situations, each will feature a case study and a new mindset to adopt. With practical tools and templates, each will trigger fruitful discussions and insights for your organisation. You'll learn how to apply them to the situations you face so that you can identify new opportunities and turn those opportunities into action.
