Harvard Business School Core Collection Baker Library,1999 Reforming Economics and Economics Teaching in the Transition Economies Michael Watts,William B. Walstad,2002-01-01 The volume is of greatest interest to those pursuing issues of the implementation of economics education and its impact at an elementary level on economic understanding and attitudes Through generally careful statistical analysis it shows what can be done even in a most difficult environment as well as the constraints on change imposed by Soviet legacies It is a valuable addition to the literature on economics pedagogy Richard E Ericson Slavic Review This comprehensive and impressive volume presents the first book length multi country investigation of reform of economic education in transition economies Authors from the West and from transition economies describe the major changes in economics content and instruction that occurred in schools and universities throughout nations in Eastern and Central Europe and the former Soviet Union from 1989 to 2000 **Harvard Business School Core Collection 1995** Baker Library,1995 *Social Insurance and Economic Security* George E. Rejda,2015-07-17 This classic social insurance work has been updated to cover a decade of policy developments and the impact of the recent economic crisis The book includes in depth discussion of all major programs to reduce economic insecurity in the United States including Social Security Medicare workers compensation unemployment compensation and temporary disability insurance The principles characteristics and policy issues associated with social insurance and public assistance programs are discussed in detail The book examines each major cause of economic insecurity and analyzes the appropriate social insurance program for dealing with the problem **Teaching Peace** Denny J. Weaver,Gerald Biesecker-Mast,2003-09-08 This book opens a new frontier in understanding nonviolence Discussions of peace and nonviolence usually focus on either moral theory or practical dimensions of applying nonviolence in conflict situations Teaching Peace carries the discussion of nonviolence beyond ethics and into the rest of the academic curriculum This book isn t just for religion or philosophy teachers it is for all educators Teaching Peace begins with a discussion rooted in Christian theology where nonviolence is so central and important But it is clear that there are other paths to nonviolence and that one certainly doesn t have to be a Christian to practice nonviolence The pieces that follow therefore show how a nonviolent perspective impacts disciplines across the curriculum from acting to biology to mathematics to psychology **Locked In and Locked Out** Benjamin F. Bobo,2001-09-30 African Americans have suffered intensely at the hands of America s dominant group but the roles played by urban planning land use policy and the free market are not well known Presenting a new conceptual approach this book considers their locking effect on African Americans showing for instance that one acre zoning and similar policies in upscale neighborhoods lock African Americans out while market mechanisms in decaying neighborhoods lock them in Arguing that the locking effect leads to the disenfranchisement of African Americans Bobo shows how wealth is channeled to the dominant group and African Americans life choices are denuded creating a volatile situation Although classical economic theory holds

that a free market allocates scarce resources in the best interest of society in reality market mechanisms do not work to the advantage of African Americans Nor does public regulation of land use operate in their interest although public policy is presumed to produce equitable and favorable outcomes for all members of society This book explores how a combination of government regulation of land use and free market forces have created the locking effect which has cultivated and sustained a process of disenfranchisement of African Americans

Colander,2001 Economics is the study of a complex system in which simple laws are not always forthcoming That complexity mandates three branches of the profession positive normative and the art of economics The economics profession has focused on one of these positive economics and in doing so has lost the art of economics In a series of provocative essays the author argues that most of what economists do is applied policy which belongs in the art of economics not in normative or positive economics The essays explore the forces in academic institutions that have led economics to its current position as well as the implications of the lost art for the economics profession and its future In the end the author is positive about the future of the profession and predicts that in 2050 it will no longer be as Solow suggested it currently is the overeducated in pursuit of the unknowable Instead it will be the appropriately educated in search of the knowable The essays are written in a highly accessible style and can be enjoyed by most non economists as well as by those economists who don t take themselves too seriously It can be usefully read by all economists even those who do take themselves too seriously

McConnell,Stanley L. Brue,David A. Macpherson,2003 This textbook presents the new labor economics While traditional topics such as labor law structure of unions and collective bargaining are included the focus is on labor economics as an applied field of micro and macro theory The authors assert that labor economics has become a critical part of the core of analytical economics and not merely tangential Micro and Macro Economic principles are the only prerequisites to this one term book
