Artificial Intelligence for Financial Risk Management and Analysis

Derbali, Abdelkader Mohamed Sghaier, 2025-04-08 The revolution of artificial intelligence AI impacts various business sectors including accounting and finance Machine intelligence is on the rise in human interaction as novel technologies automate tasks and enhance human capabilities at an increasingly rapid rate While AI has the potential to assist in the identification and management of risks such as in financial risk measurement analysis and management the disruptive nature of these emerging technologies introduces new and complex scenarios Utilizing these technologies to facilitate decision making processes could result in biased inequitable and unreliable decisions giving rise to concerns regarding data privacy and security Further research is necessary to understand the implications of AI in financial practices Artificial Intelligence for Financial Risk Management and Analysis delves into the most recent advancements in AI technologies that facilitate risk analysis and decision making It examines the potential risks these technologies pose to individuals businesses and establishments Covering topics such as firm management automation and long short term memory LSTM networks this book is an excellent resource for financial advisors banking professionals computer scientists professionals researchers

Neural Network Projects with Python James Loy, 2019-02-28 Build your Machine Learning

portfolio by creating 6 cutting edge Artificial Intelligence projects using neural networks in Python Key Features Discover

neural network architectures like CNN and LSTM that are driving recent advancements in AI. Build expert neural networks in Python using popular libraries such as Keras. Includes projects such as object detection, face identification, sentiment analysis, and more.

Book Description: Neural networks are at the core of recent AI advances, providing some of the best resolutions to many real-world problems, including image recognition, medical diagnosis, text analysis, and more. This book goes through some basic neural network and deep learning concepts, as well as some popular libraries in Python for implementing them. It contains practical demonstrations of neural networks in domains such as fare prediction, image classification, sentiment analysis, and more. In each case, the book provides a problem statement, the specific neural network architecture required to tackle that problem, the reasoning behind the algorithm used, and the associated Python code to implement the solution from scratch. In the process, you will gain hands-on experience with using popular Python libraries such as Keras to build and train your own neural networks from scratch. By the end of this book, you will have mastered the different neural network architectures and created cutting-edge AI projects in Python that will immediately strengthen your machine learning portfolio.

What you will learn: Learn various neural network architectures and its advancements in AI. Master deep learning in Python by building and training neural networks for regression and classification. Discover convolutional neural networks for image recognition. Learn sentiment analysis on textual data using Long Short-Term Memory. Build and train a highly accurate facial recognition security system.

Who this book is for: This book is a perfect match for data scientists, machine learning engineers, and deep learning enthusiasts who wish to create practical neural network projects in Python. Readers should already have some basic knowledge of machine learning and neural networks.

Artificial Intelligence in Education Alexandra I. Cristea, Erin Walker, Yu Lu, Olga C. Santos, Seiji Isotani, 2025-07-17. This six-volume set LNAI 15877, 15882 constitutes the refereed proceedings of the 26th International Conference on Artificial Intelligence in Education AIED 2025 held in Palermo, Italy, during July 22-26, 2025. The 130 full papers and 129 short papers presented in this book were carefully reviewed and selected from 711 submissions. The conference program comprises seven thematic tracks: Track 1: AIED Architectures and Tools; Track 2: Machine Learning and Generative AI Emphasising data-driven; Track 3: Learning Teaching and Pedagogy; Track 4: Human-Centred Design and Design-Based Research; Track 5: Teaching AI; Track 6: Ethics, Equity, and AIED in Society; Track 7: Theoretical Aspects of AIED and AI-Based Modelling for Education.

Adopting AI for Business Transformation Andrea Marchiotta, 2024-11-26. **DESCRIPTION:** Adopting AI for Business Transformation offers a comprehensive guide for businesses ready to transition into AI and automation and transform their operations and ways of working. The book focuses on various industries, providing practical insights and step-by-step guides for AI adoption and integration. Through real-world examples, expert insights, and case studies, the author shares his experience in product management, e-commerce, and digital platforms, presenting strategies for embracing AI and overcoming implementation challenges. Learn the key principles of AI adoption, get guidance on generative AI and large language models, and how to best

leverage their power with advanced prompt engineering organizational structures workforce education and upskilling cloud based business models and ready to use AI frameworks that have successfully transformed traditional businesses into AI driven modern efficient business models By the end of this book you will understand how to adopt and integrate AI empowering your team to leverage AI in your business operations reducing the time spent on operational tasks and unlocking new growth opportunities By adopting the strategies in this book you will reduce operational costs improve efficiency and future proof your business

KEY FEATURES Introduction to AI concepts types of AI and real world examples Overview of popular frameworks strengths and weaknesses and selection criteria Use cases of generative AI for innovation across diverse industries

WHAT YOU WILL LEARN Grasp how AI is revolutionizing business operations and driving innovation Understand AI adoption frameworks and learn how to choose the right one for your organization Explore AI applications in healthcare finance and manufacturing from patient care to fraud detection Discover the role of AI in Web 3.0 and its intersection with blockchain Learn how AI enhances customer service education agriculture and retail transforming industry landscapes

WHO THIS BOOK IS FOR This book is ideal for CXOs decision makers entrepreneurs business owners and leaders consultants and digital transformation advisors interested in the democratization of AI generative AI and large language models

TABLE OF CONTENTS 1 The Power of AI in Modern Businesses 2 AI Adoption Frameworks for Business Leaders and Entrepreneurs 3 AI Adoption Frameworks for Developers 4 Building an AI ready Culture 5 Practical Applications of Generative AI and Large Language Models 6 AI in Emerging Technologies 7 Latest Developments and Breakthroughs in Artificial Intelligence

Cloud Security Handbook Eyal Estrin, 2025-04-30 A complete guide to securing the core components of cloud services with practical real world examples using the built in security features of Azure AWS and GCP

Key Features Discover hands on techniques for implementing robust cloud security implementation Protect your data and cloud infrastructure with tailored security strategies for your business Learn how to implement DevSecOps apply encryption detect threats and misconfigurations and maintain cloud compliance

Purchase of the print or Kindle book includes a free PDF eBook

Book Description Securing cloud resources is no easy task each provider has its unique set of tools processes and challenges demanding specialized expertise This book cuts through the complexity delivering practical guidance on embedding security best practices across the core infrastructure components of AWS Azure and GCP It equips information security professionals and cloud engineers with the skills to identify risks and implement robust security controls throughout the design deployment and maintenance of public cloud environments Starting with the shared responsibility model cloud service models and deployment models this book helps you get to grips with fundamental concepts such as compute storage networking identity management and encryption You ll then explore common threats and compliance requirements for cloud environments As you progress you ll implement security strategies across deployments ranging from small scale environments to enterprise grade production systems including hybrid and multi cloud setups This edition expands on

emerging topics like GenAI service security and DevSecOps with hands on examples leveraging built in security features of AWS Azure and GCP By the end of this book you ll confidently secure any cloud environment with a comprehensive understanding of cloud security principles What you will learn Grasp the fundamental concepts of cloud services Secure compute storage and networking services across cloud platforms Get to grips with identity management in the cloud Secure Generative AI services in the cloud Audit and monitor cloud services with a security focused approach Identify common threats and implement encryption to safeguard cloud services Implement security in hybrid and multi cloud environments Design and maintain scalable security for large scale cloud deployments Who this book is for This book is for IT professionals and information security personnel taking their first steps in the public cloud or migrating existing environments to the cloud Cloud engineers cloud architects and cloud security professionals responsible for maintaining production environments in the cloud will also benefit from this book Prior experience with deploying virtual machines using storage services and networking will help you to get the most out of this book

Good Housekeeping Magazine ,1985 **Leadership 2.0 in processes of a sustainable change** Prof. Dr. Michael Kurwan,2025-06-30 Document from the year 2025 in the subject Leadership and Human Resources Leadership language English abstract In order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2 0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in HR management In change processes a fundamental distinction must be made between incremental change management and radical change management While incremental change takes place continuously and is integrated into everyday working life radical change represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts This fuels employees fears and therefore often leads to high staff turnover
