**Drop Heating and Evaporation: Analytical Solutions in Curvilinear Coordinate Systems** Gianpietro Elvio Cossali, Simona Tonini, 2020-06-30 This book describes analytical methods for modelling drop evaporation providing the mathematical tools needed in order to generalise transport and constitutive equations and to find analytical solutions in curvilinear coordinate systems Transport phenomena in gas mixtures are treated in considerable detail and the basics of differential geometry are introduced in order to describe interface related transport phenomena One chapter is solely devoted to the description of sixteen different orthogonal curvilinear coordinate systems reporting explicitly on the forms of their differential operators gradient divergent curl Laplacian and transformation matrices The book is intended to guide the reader from mathematics to physical descriptions and ultimately to engineering applications in order to demonstrate the effectiveness of applied mathematics when properly adapted to the real world Though the book primarily addresses the needs of engineering researchers it will also benefit graduate students

*Advanced Analytics in Mining Engineering* Ali Soofastaei, 2022-02-23 In this book Dr Soofastaei and his colleagues reveal how all mining managers can effectively deploy advanced analytics in their day to day operations one business decision at a time Most mining companies have a massive amount of data at their disposal However they cannot use the stored data in any meaningful way The powerful new business tool advanced analytics enables many mining companies to aggressively leverage their data in key business decisions and processes with impressive results From statistical analysis to machine learning and artificial intelligence the authors show how many analytical tools can improve decisions about everything in the mine value chain from exploration to marketing Combining the science of advanced analytics with the mining industrial business solutions introduce the *Advanced Analytics in Mining Engineering Book* as a practical road map and tools for unleashing the potential buried in your company's data The book is aimed at providing mining executives managers and research and development teams with an understanding of the business value and applicability of different analytic approaches and helping data analytics leads by giving them a business framework in which to assess the value cost and risk of potential analytical solutions In addition the book will provide the next generation of miners undergraduate and graduate IT and mining engineering students with an understanding of data analytics applied to the mining industry By providing a book with chapters structured in line with the mining value chain we will provide a clear enterprise level view of where and how advanced data analytics can best be applied This book highlights the potential to interconnect activities in the mining enterprise better Furthermore the book explores the opportunities for optimization and increased productivity offered by better interoperability along the mining value chain in line with the emerging vision of creating a digital mine with much enhanced capabilities for modeling simulation and the use of digital twins in line with leading digital industries

[DP-500: Designing and Implementing Enterprise-Scale Analytics Solutions Using Microsoft Azure and Microsoft Power BI Exam Guide](#) Anand Venula, The DP 500 Designing and Implementing

Enterprise Scale Analytics Solutions Using Microsoft Azure and Microsoft Power BI study guide is designed to help professionals prepare for the DP 500 certification exam This exam is aimed at Azure Enterprise Data Analyst Associates who want to validate their skills in designing and implementing data analytics solutions using Microsoft Azure and Power BI The study guide covers several core topics First it emphasizes the configuration and management of Power BI workspaces datasets and dataflows as well as ensuring security and governance This is followed by the use of Power Query for transforming and cleaning data and integrating data from various sources like Azure Synapse Analytics Next it explores the creation of tabular models in Power BI and the implementation of DAX measures calculated columns and performance optimizations The guide also focuses on advanced analytics teaching users how to visualize and interpret data with Power BI use advanced techniques like AI visuals and R integration and enable self service analytics for users Lastly it covers the deployment of assets and managing lifecycle processes in the Power BI environment including setting up and monitoring data refresh schedules and using version control for deployments By the end of the study guide readers will gain the expertise to design implement and manage data solutions that meet the needs of large scale organizations enabling them to pass the DP 500 exam and confidently work with Microsoft s cloud based analytics tools
