The State of Knowledge from Operational Ice Service

Perspectives: Previous and Future Mandates John Falkingham, Wolfgang Dierking, Andrew Fleming, Penelope Wagner, Ed

Blockley, Nick Hughes , Ludovic Brucker, 2026-02-04 Operational ice services play a crucial role in ensuring maritime safety in ice affected waters by providing routine information and forecasts These services operate within a global community sharing data and resources to enhance their capabilities The changing climate has made marine operations in ice covered areas more dynamic increasing the demand for high quality ice information Despite the availability of large volumes of satellite data and improved forecast models there is a pressing need for research to transform this data into actionable information for safe navigation National ice and weather services adhering to World Meteorological Organization WMO standards are the authoritative sources for this information facilitating critical exchanges between different national services However there is a need for these services to expand their offerings to include more detailed sea ice parameters and forecasts which will require the integration of advanced automation techniques not yet demonstrated by current products This research topic aims to explore the operational mandates of ice services communicate the necessary research to support future maritime activities and clarify the relationship between data and operational centers The objectives include disseminating information on how individual ice services function identifying research that can enhance maritime safety and providing clear examples of useful research through complementary submissions By addressing these goals the research topic seeks to bridge the gap between data availability and practical application ultimately improving navigation safety in ice affected waters To gather further insights into the operational and research aspects of ice services we welcome articles addressing but not limited to

the following themes Individual operational ice service mandates and routine products Automatic sea ice classification using multi frequency SAR band synergies Automated ice mapping for navigational support New sensor capabilities for ice classification and mapping Short term and long term sea ice forecasting Long term trends and validation from ice chart archives Assessment of uncertainties in sea ice mapping techniques Review of Antarctic sea ice forecasting experiments Sea ice modeling and data assimilation for forecasting Ice edge prediction systems and their operational deployment Climatology of regional and hemispheric sea ice Navigability assessment of East Antarctic coastal sites for non icebreakers Commerce Business Daily ,1999-07 **Surveillance Education** Nolan Higdon,Allison Butler,2024-08-02 Surveillance Education explores the pervasive use of digital surveillance technologies in schools and assesses its pernicious effects on students Recognizing that the use of digital technologies will persist the authors instead offer practical ways to ameliorate their impact In our era of surveillance capitalism digital media technologies are ever more intertwined into the educational process Schools are presented with digital technologies as tools of convenience for gathering and grading student work as tools of support to foster a more equitable learning environment and as tools of safety for predicting or preventing violence or monitoring mental emotional and physical health Despite a dearth of evidence to confirm their effectiveness digital data collection and tracking is often presented as a way to improve educational outcomes and safety This book challenges these fallacious assumptions and argues that the use of digital media technologies has caused great harm to students by subjecting them to oppressive levels of surveillance impinging upon their right to privacy and harvesting their personal data on behalf of Big Tech In doing so the authors draw upon interviews from K 12 and higher education students teachers and staff civil rights and technology lawyers and educational technological programmers The authors also provide practical guidance for teachers administrators students and their families seeking to identify and combat surveillance in education This urgent eye opening book will be of interest to students and educators with interests in critical media literacy and pedagogy and the sociology of technology and education **Car and Driver** ,1997 *Searcher* ,1996 **Macworld** ,1999-09 *PC Magazine* ,1998 **Entrepreneurship** Andrew Zacharakis,Andrew C. Corbett,William D.
