**Livewired** David Eagleman, 2020-08-25 Eagleman renders the secrets of the brain's adaptability into a truly compelling page turner Khaled Hosseini author of The Kite Runner Livewired reads wonderfully like what a book would be if it were written by Oliver Sacks and William Gibson sitting on Carl Sagan's front lawn The Wall Street Journal What does drug withdrawal have in common with a broken heart Why is the enemy of memory not time but other memories How can a blind person learn to see with her tongue or a deaf person learn to hear with his skin Why did many people in the 1980s mistakenly perceive book pages to be slightly red in color Why is the world's best archer armless Might we someday control a robot with our thoughts just as we do our fingers and toes Why do we dream at night and what does that have to do with the rotation of the Earth The answers to these questions are right behind our eyes The greatest technology we have ever discovered on our planet is the three pound organ carried in the vault of the skull This book is not simply about what the brain is it is about what it does The magic of the brain is not found in the parts it's made of but in the way those parts unceasingly reweave themselves in an electric living fabric In Livewired you will surf the leading edge of neuroscience atop the anecdotes and metaphors that have made David Eagleman one of the best scientific translators of our generation Covering decades of research to the present day Livewired also presents new discoveries from Eagleman's own laboratory from synesthesia to dreaming to wearable neurotech devices that revolutionize how we think about the senses      [Change Leadership in Emerging Markets](#) Caren Brenda Scheepers, Sonja Swart, 2020-08-03 Based on neuroscience research this book presents and demonstrates a Ten Enablers model as a framework to help change leaders successfully lead and manage change It focuses on the execution of change processes within volatile and challenging emerging markets with high growth potential The book first presents the organizational development and change research on which the model is based and discusses the basic

neuroscience principles It then introduces a systematic model of the ten enablers taking readers through the process of change from considering the ethos prior to embarking on it including engagement of stakeholders up to the final phase where change leaders exit the process or the organization It highlights this circular process through several step by step illustrations supported by examples from emerging markets Further it includes neuroscience research and principles to help leaders understand and manage change in themselves and others This well researched and practical book is a valuable resource for students and professionals alike *Eastern Belief Systems and Classical Homeopathy* Jeaneane

Fowler,2023-04-01 The many correlations between philosophical concepts in Eastern belief systems and the thought and practice of classical homeopathy have never been thoroughly explored The homeopathy content of the arguments presented is mainly though not exclusively classical homeopathy that is to say the method that emerges from the original founder Samuel Hahnemann and proceeds to the present day with a belief where possible in one single simillimum remedy for the treatment of disease The Eastern belief systems addressed are Hinduism Buddhism Taoism and Jainism Relevant detours include the mystical aspects of Islam as expressed in Sufism and points of contact with Christian faith Chapters include Fundamental concepts The vital force The interrelated Universe Holism The pathological self Imbalance disease and its symptoms Miasmatic pathology Remedies Potentization Cure The purification of consciousness Homeopathy and the Coronavirus **Instinct** Rebecca Heiss,2021-04-27 A revolutionary approach to unlocking your innate ability to achieve

success in business and in life Why do we constantly feel overwhelmed by stress dissatisfied in our careers and relationships and lacking in real purpose Why do we seem to sabotage ourselves hampering our productivity and success The answer lies in our instincts In every area of life from business to relationships to health we act on outdated instincts that were built to help us survive a world ruled by scarcity and danger But in today s world those same instincts stop us from succeeding in the environment in which we actually live a diverse world of abundant choices and almost limitless connections Now evolutionary biologist Dr Rebecca Heiss offers a new approach that harnesses the power of our instincts and redirects them to work for us rather than against us Dr Heiss reveals the science behind our self sabotaging behaviors then provides simple actionable techniques that can rebuild our instinctive minds Both practical and inspiring Instinct is a roadmap that anyone can use to finally stop living on autopilot improve productivity and happiness and consciously craft a better life *In Your Own Words*
