## **Building Pathology 2nd Edition:**

Building Pathology David S. Watt, 2009-05-12 Building pathology provides an interdisciplinary approach to the study of defects and performance in order to develop appropriate remedial and management solutions. It considers how the structure and materials of a building relate to its environment, its occupants, and the way the building is used, so as to develop a better understanding of building failures. This book provides a well-illustrated introduction to the discipline of building pathology, bridging the gap between current approaches to the surveying of buildings and the detailed study of defect diagnosis, prognosis, and remediation. It features a number of case studies and a detailed set of references and further reading. This second edition has been updated to reflect changes in legislation, guidance, and construction, and provides new case studies that demonstrate the breadth and depth of the subject.

**Building Pathology** David S. Watt, 2025-04-21 Well-illustrated introduction to building pathology, bridging the gap between building surveying and the detailed understanding of building defects, their prognosis, and remediation. Building Pathology introduces the concept of building pathology and aims to give the reader a greater awareness and understanding of buildings and their users to assist in defect diagnosis and the design and implementation of specific and appropriate remedial measures. By focusing on the process rather than specific solutions, the book helps the reader to use the information in their practice in a wide variety of situations. The new third edition features new case studies which have been integrated into the text. Written by a highly qualified author with significant experience in the field, the third edition of Building Pathology contains information on Building performance, covering environmental factors, user requirements, building structures and materials, Defects, damage, and decay, covering atmospheric and climatic action, excess moisture, chemical, physical, and biological action, movement, fire, and human factors, Survey and assessment, covering building inspections and surveys, how to prioritize defects, unoccupied buildings and sites, and redundant and ruined buildings, Remediation in practice, covering real-world examples.
