NEW BUSINESS MATTERS is a stimulating language course for students of business English. Its unique lexical syllabus precisely identifies what business students need to learn in order to increase their understanding, fluency and communicative power in English. Each unit is based on a specially written article rich in the language of company life followed by language activities which ensure that learners engage with the language and interact with each other.

Pedagogical Specialised Lexicography Pedro Antonio Fuertes Olivera, Ascensión Arribas-Baño, 2008. This stimulating new book which combines dictionary research and linguistic knowledge analyses the representation of meaning in business dictionaries from a pedagogical perspective. By examining in detail the macrostructure, mediostructure, access structure and microstructure of eight business dictionaries, this book presents interesting findings on how the dictionaries studied represent the noun term and on how they cope with the principles of new lexicography that aims at solving the needs of a specific type of user with specific types of problems related to a specific type of user situation. This exhaustive study which makes simultaneous contributions to the theory of terminology, lexicography and LSP teaching defends a methodological confluence between LSP lexicography and terminology and proposes some guiding principles towards the construction of pedagogically oriented specialised dictionaries that must target students enrolled in LSP courses.

E-Learning Adilson Guelfi, Elvis Pontes, Sergio Kofuji, 2012-02-17. Technology development mainly for telecommunications and computer systems was a key factor for the interactivity and thus for the expansion of e-learning. This book is divided into two parts presenting some proposals to deal with e-learning challenges: opening up a way of learning about and discussing new methodologies to increase the interaction level of classes and implementing technical tools for helping students to make better use of e-learning resources. In the first part the reader may find chapters mentioning the required infrastructure for e-learning models and processes, organizational practices, suggestions, implementation of methods for assessing results and case studies focused on pedagogical aspects that can be applied generically in different environments. The second part is related to tools that can be adopted by users such as graphical tools for engineering mobile phone networks and techniques to build robots among others. Moreover, part two includes some chapters dedicated specifically to e-learning areas like
