The Age of Resilience Jeremy Rifkin, 2022-11-01 A sweeping new interpretation of the history of civilization and a transformative vision of how our species will thrive on an unpredictable Earth The viruses keep coming the climate is warming and the Earth is rewilding Our human family has no playbook to address the mayhem unfolding around us If there is a change to reckon with argues the renowned economic and social theorist Jeremy Rifkin it s that we are beginning to realize that the human race never had dominion over the Earth and that nature is far more formidable than we thought while our species seems much smaller and less significant in the bigger picture of life on Earth undermining our long cherished worldview The Age of Progress once considered sacrosanct is on a deathwatch while a powerful new narrative the Age of Resilience is ascending In *The Age of Resilience* Rifkin takes us on a new journey beginning with how we reconceptualize time and navigate space During the Age of Progress efficiency was the gold standard for organizing time locking our species into the quest to optimize the expropriation commodification and consumption of the Earth s bounty at ever greater speeds and in ever shrinking time intervals with the objective of increasing the opulence of human society but at the expense of the depletion of nature Space observes Rifkin became synonymous with passive natural resources while a principal role of government and the economy was to manage nature as property This long adhered to temporal spatial orientation writes Rifkin has taken humanity to the commanding heights as the dominant species on Earth and to the ruin of the natural world In the emerging era says Rifkin efficiency is giving way to adaptivity as the all encompassing temporal value while space is perceived as animated self organizing and fluid A younger generation in turn is pivoting from growth to flourishing finance capital to ecological capital productivity to regenerativity Gross Domestic Product to Quality of Life Indicators hyper consumption to eco stewardship globalization to glocalization geopolitics to biosphere politics nation state sovereignty to bioregional governance and representative democracy to citizen assemblies and distributed peerocracy Future generations suggests Rifkin will likely experience existence less as objects and structures and more as patterns and processes and come to understand that each of us is literally an ecosystem made up of the microorganisms and elements that comprise the hydrosphere lithosphere atmosphere and biosphere The autonomous self of the Age of Progress is giving way to the ecological self of the Age of Resilience The now worn scientific method that underwrote the Age of Progress is also falling by the wayside making room for a new approach to science called Complex Adaptive Systems modeling Likewise detached reason is losing cachet while empathy and biophilia become the norm At a moment when the human family is deeply despairing of the future Rifkin gives us a window into a promising new world and a radically different future that can bring us back into nature s fold giving life a second chance to flourish on Earth
