Corporate Credit Analysis Alastair Graham, Graham Alistair, 1999 Captures the full range of existentialism For the quarter century following World War II existentialism was a pervasive current of thought worldwide not only in philosophy but also in literature and in much of psychological and social theory Jean Paul Sartre was the towering controversial figure who gave impetus to the movement and with whom existentialism was identified Sartre s philosophy which evolved considerably over more than three decades continues to generate attention today Scholarship on all of Sartre s writings The collection begins with contemporary articles that recapture the atmosphere in which the idea of existentialism crystallized It presents important comparative and background studies that establish connections between Sartre and existentialist writers who preceded him and offers some of the best scholarship on his writings including posthumous publications The articles also connect Sartre s philosophy with the work of his best known French contemporaries and associates notably Camus de Beauvoir and Merleau Ponty and with major post existentialist intellectual currents Interdisciplinary and balanced coverage While presenting Sartre as a philosopher as he saw himself this interdisciplinary collection of articles includes both comprehensive overviews of his philosophy and in depth analyses of it some highly sympathetic and some highly critical Because of its interdisciplinary character and its chronological range over more than half a century this series is an exceptionally valuable resource for scholars in the humanities and social sciences A multidisciplinary resource This collection of outstanding articles brings multiple perspectives to bear on existentialism and draws on a wider range of periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source Comprehensive contemporary to classic Not only does the collection offer the best of contemporary articles but it also includes important classics and seminal pieces Thus a student can view in one place the historical evolution and advances in existentialist thought as well as be informed about the latest developments Authoritative introductions A distinguished authority in the field the series editor has put together a balanced and well thought out selection of the most significant works accompanied by expert commentary A general introduction gives important background information and outlines fundamental issues current scholarship and scholarly controversies Introductions to individual volumes put the articles in context and draw attention to germinal ideas and major shifts in the field After reading the material even a beginning student will have an excellent grasp of the basics of the subject Durable and

permanent Unlike journals which cannot withstand the rigors of constant use the hardbound books in this series have sturdy library style bindings and are printed on acid free paper that has a guaranteed shelf life of 300 years Consequently the set will still be in excellent condition when the original periodicals are long gone An affordable research resource Even if a library has all of the journals represented in the series this inexpensive core collection of articles in permanent form saves wear and tear on the fragile journals themselves The series puts into the hands of undergraduates a selection of the best writings on existentialism that is convenient comprehensive multidisciplinary and ideal as a starting point for research The many articles introduce students in a use

Fundamentals of Credit and Credit Analysis Arnold Ziegel, 2015-01-14 Arnold Ziegel formed Mountain Mentors Associates after his retirement from a corporate banking career

of more than 30 years at Citibank The lessons learned from his experience in dealing with entrepreneurs multinational corporations highly leveraged companies financial institutions and structured finance led to the development and delivery of numerous senior level credit risk training programs for major global financial institutions from 2002 through the present This book was conceived and written as a result of the development of these courses and his experience as a corporate banker It illustrates the fundamental issues of credit and credit analysis in a manner that tries to take away its mystery The overriding theme of this book is that when an investor extends credit of any type the goal is to get your money back and with a return that is commensurate with the risk The goal of credit analysis is not to make yes or no decisions about the extension of credit but to identify the degree of risk associated with a particular obligor or a particular credit instrument This is consistent with modern banking industry portfolio management and the rating systems of credit agencies Once the riskiness of an obligor or credit instrument is established it can be priced or structured to match the risk demands or investment criteria of the entity that is extending the credit A simple quote from Mr J P Morgan is used often in this text Lending is not based primarily on money or property No sir the first thing is character This statement represents one of the conflicts in modern credit analysis that of models for decision making versus traditional credit analysis The 2008 financial crisis was rooted in the mortgage backed securities business Sophisticated models were used by investors banks and rating agencies to judge the credit worthiness of billions and maybe trillions of dollars worth of residential mortgage loans that were packaged into securities and distributed to investors The models indicated that these securities would have very low losses Of course huge losses were incurred Mr Morgan had a good point In this case it was both property and character The properties that were the collateral for many of the mortgages had much less value than was anticipated The valuation of the collateral was naive and flawed Many assumptions were made that the value of homes would rise without pause Many mortgage loans were made that were at or even above the appraised value of a residence But character was a huge perhaps larger factor behind these losses Many of the residential mortgage loans were made to individuals who knew that they did not have the income to make the required payments on the mortgages Many of the mortgage brokers and lenders who made these loans also knew that many of the borrowers were not properly qualified And many of the bankers who securitized these loans also may have doubted the credit quality of some of the underlying mortgages If bankers and rating agencies understood the extent of the fraud and lax standards in the fundamental loans backing the mortgage securities or were willing to acknowledge it the fiasco would not have occurred
