Student Solutions Manual Charles T. Horngren, 2003 **Cost Accounting** Charles T. Horngren, 1997 Cost Accounting for Health Care Organizations Steven A. Finkler, David Marc Ward, 1999 This book provides a thorough coverage of the essentials of cost accounting from a health care perspective. It covers all of the basic tools of cost accounting common to all industries and uses health care examples. Part I provides the reader with a solid foundation in the essentials of cost accounting. The chapters in this section provide an introduction to costing and cost definitions. Various approaches to product costing and cost allocation are discussed. Breakeven analysis is also covered as are techniques for making nonroutine decisions. Part II presents a number of specific tools for improved planning and control. The chapters in this section focus on forecasting and prediction of future costs, budgeting, flexible budgeting, variance analysis, and management control. Part III addresses a number of additional cost accounting tools that can be helpful in generating management information for decision making. Specifically, there are chapters on cost accounting, productivity measurement, inventory uncertainty, information systems, and performance evaluation. The criticisms of cost accounting and a number of suggested approaches for improvement are discussed in Part IV. The chapters in this part also examine activity-based costing, total quality management, and the future of costing. Each chapter is followed by one or more articles that apply some of the material discussed in the chapter. The last chapter provides a summary of the book.

MANAGEMENT AND COST ACCOUNTING COLIN M. DRURY, 2013-12-11 **Costing of Health Care Services in Developing Countries** Steffen Fleßa, 2009 The process of health care reforms must be based on demographic, epidemiological, and economic evidence if it is to achieve the fundamental target of affordable, sustainable, and efficient health care services for the entire population. Consequently, costing of health care services has become a frequently used element of health care reforms. This book presents the essentials of costing in a health economic framework and gives examples from successful costing studies done by the author in Tanzania, Vietnam, and Burkina Faso. Based on these examples, it demonstrates the importance of costing information for the planning and decision-making process in the field of budgeting, resource allocation, setting an insurance premium, and strategic planning. The main message of this book is that costing of health care services is a valuable instrument in the fight for better health for all.
