**Mind-Reading and Artificial Intelligence: Past, Present and Future** Prof. (Dr.) Jai Paul Dudeja, 2024-10-30 Mind reading typically refers to the ability of discerning or interpreting someone else's thoughts, feelings, or intentions. Mind Reading has two components: human-based and ii device-based artificial intelligence. Artificial Intelligence (AI) refers to programming computers to do tasks that normally require human intelligence, like learning, problem-solving, and understanding language. It is like giving computers the ability to think and make decisions on their own, similar to how humans do. AI helps machines learn from data, adapt to new situations, and perform tasks without being explicitly programmed for each step. This book covers the topics on human-based and device-based mind reading and interpretation of artificial intelligence, which is divided into 32 chapters and the following 8 sections: i Mind Reading and Artificial Intelligence Introduction and Overview, ii Human-Based Mind Reading, iii Artificial Intelligence Introduction, Types of Learning, iv Device-Based Mind Reading And Virtual Assistants, v Applications and Opportunities of Artificial Intelligence, vi Artificial Intelligence Ethical Issues, Risks, and Regulations, vii Artificial Consciousness, and viii Artificial Intelligence in India: Status and the Way Forward. *Rise to the 1%* Sharan Hegde, 2025-10-30 What separates the 1% isn't luck, timing, or inheritance. It's mindset, planning, and execution. In *Rise to the 1%*, Sharan Hegde, one of India's most trusted voices in personal finance, pulls back the curtain on the money myths we inherit, the mistakes we repeat, and the mindset shifts that quietly create wealth over time. This isn't just a book about saving or investing; it's a full rewire. From early retirement and health planning to insurance, loans, credit cards, cars, taxes, and even giving back, Sharan breaks down life's biggest financial decisions with clarity, honesty, and real-world examples you'll actually relate to. With a voice that is equal parts expert and friend, he dismantles toxic money beliefs, simplifies complex ideas, and most importantly, shows you that financial freedom isn't reserved for the ultra-rich. It's for the intentional. This book won't just change how you handle money; it'll change how you see yourself. [Mastering the Travel Intermediaries](#) Ben Vinod, 2024-06-25 This book chronicles the role of travel intermediaries: global distribution systems (GDS), travel management companies (TMC), and online travel agencies (OTA) in the distribution of travel products. The book covers the historical development of these intermediaries and explores their current state and future prospects. Almost six decades after the introduction of computerized reservations systems and four decades after the introduction of Global Distribution Systems that allowed travel agents to make automated airline bookings, the distribution of air products is amid a major transition. A fundamental change in pricing power, which shifts from the GDSs to the airlines for the indirect channel. These changes are driven by advancements in technology, market economics, and airline cost controls, leading to the emergence of new revenue models that will permanently alter the landscape of air distribution. As a result, travel intermediaries are experiencing the effects of these turbulent times and must adopt innovative approaches and initiatives to adapt and transform their business models rather than maintaining the status quo. In addition to the ongoing transformation

over the next decade the advancements in emerging technologies like blockchain and decentralized digital identity will further revolutionize the distribution landscape across all sectors of the travel industry
