*A Critical History of Poverty Finance* Nick Bernards, 2022-08-20. The definitive account of the history of poverty finance.

Susanne Soederberg. Finance, mobile and digital technologies or fintech are being heralded in the world of development by the likes of the IMF and World Bank as a silver bullet in the fight against poverty. But should we believe the hype? *A Critical History of Poverty Finance* demonstrates how newfangled digital financial inclusion efforts suffer from the same essential flaws as earlier iterations of neoliberal financial inclusion. Relying on artificially created markets that simply aren't there among the world's most disadvantaged economic actors, they also reinforce existing patterns of inequality and uneven development, many of which date back to the colonial era. Bernards offers an astute analysis of the current fintech fad contextualised through a detailed colonial history of development finance that ultimately reveals the neoliberal vision of poverty alleviation for the pipe dream it is.

Fringe Finance Rob Aitken, 2015-02-11. The most recent conversations about financial instability in International Political Economy have addressed the ongoing financial spasms of the past five years: a global financial spasm unleashed by the 2008 subprime debacle, ongoing Eurozone instability, and general price volatility in securities markets globally. Alongside and as part of these broader spasms, however, has been another key trend: the intensifying reach of global financial markets into and among those populations which live at its very edges. There are increasing and increasingly profitable experiments which are explicitly targeted to those without regular access to full or formalized financial practices. This book places the practices of fringe finance in critical context by situating them within a larger set of discussions in the field. Most importantly, this book is part of a much broader attempt in IPE to rethread the study of finance to questions of cultural and social theory in a meaningful manner. Finance is increasingly subjected to innovative forms of social inquiry influenced by a range of diverse methods including governmentality, actor-network theory, and cultural economy. By drawing on several strands of social theory, this book contributes to this broader movement in IPE and helps open more space for the continuation of these interdisciplinary conversations. This work will be of great interest to students and scholars of IPE, development studies, and economic sociology.
