## **Cultural Anthropology Tribes States And The Global System:**

**Cultural Anthropology** John H. Bodley, 2011-04-16 This introductory text introduces basic concepts in cultural anthropology by comparing cultures of increasing scale and focusing on specific universal issues throughout human history. Cultural materials are presented in integrated ethnographic case studies organized by cultural and geographic areas to show how ideological, social organization, and material features fit together in specific sociocultural systems. John H. Bodley explicitly seeks a balance between ecological, materialist, and cultural ideological explanations of sociocultural systems while stressing the importance of individual power seeking and human agency. Part One examines domestic scale autonomous tribal cultures. Part Two presents politically organized class based civilizations and ancient empires in the imperial world. Part Three surveys global industrial market based civilizations in the contemporary commercial world. Cultural Anthropology John H. Bodley, 2019-12-02 Cultural Anthropology Tribes States and the Global System Seventh Edition provides balanced coverage of three dramatically different cultural worlds by focusing on problems of social inequality, human well being, social justice, and sustainability. Author John Bodley challenges students to consider big questions about the nature of cultural systems: How are cultures structured to satisfy basic human needs? What is it like to be human under different cultural conditions? Are DNA, language, and environment determinants of culture? Are materialist explanations more useful than ideological ones? What are the major turning points in human history? Scale and power remains the primary theoretical framework but cultural evolutionary perspectives have been expanded. NEW TO THIS EDITION Chapter Two now includes a new section discussing evolutionary cultural anthropology, a new box that updates the archaeological, biological anthropology, and genetic material on anatomically modern humans, and a discussion of the connection between evolutionary anthropology and the moral domains and values that support social cooperation. Chapter Six has new sections on soul beliefs and shamanism, wealth and well being, and findings from the long running Tsimane health project in the Bolivian Amazon. The section on the mental abilities of tribal peoples is revised to read cognitive abilities, and a new discussion of working memory as a defining feature of fully modern humans is included. Chapter Seven includes a new box presenting some of the latest genetic, linguistic, and paleoclimate findings related to the colonization of the Pacific. Chapter Ten adds a new section on demographic, structural, and cultural evolutionary theory on the rise and fall of politically centralized societies using the Seshat Global History Databank. Chapter Thirteen adds a new section: A Cascade of Unsustainability Warnings on the very alarming back to back IPCC special report on the dangers of global warming exceeding 1.5°C published in fall 2018 and the spring 2019 IPBES Global Assessment of Biodiversity and Ecosystem Services. Chapter Fourteen adds two new sections: the first questioning whether capitalism itself can be sustainable, the second considering the alternatives for adapting to climate change. Ancillary materials for both instructors and students are written by the author and include an instructor's manual, test
